The Truman administration's decision to embark on an arms build up in 1950 was a critical event. For the first time other than a World War the United States became a global military presence. Unlike the World Wars in this instance the deployment lasted decades altering the nature of the Cold War and the United States global role. Such a decision deserves a book dedicated to understanding the strategy and politics behind it. *The Beginnings of the Cold War Arms Race* serves that purpose. *The Beginnings of the Cold War Arms Race* reviews the state of American military affairs in the late 1940s and describes the role of atomic power in American strategy. It also outlines the factional fighting within the Truman administration over military spending and deployments and considers the Truman administration's perceptions of Soviet military power and intentions. The author presents a fascinating account of the strategy and politics behind the Truman administration's decision to engage in a massive arms build up that initiated the Cold War arms race.

Set in historical context by brief introductions, the documents are arranged in chronological order, grouped into six major periods of the Cold War: The Origins of the Cold War, The Nuclear Arms Race, The U 2 Affair, The Berlin Wall, The Cuban Missile Crisis, The Korean and Vietnam Wars, The Sino-Soviet Split, The End of the Cold War. Draws selections from a variety of countries and leaders on both sides of the Iron Curtain and treats the entire Cold War as an era in world history, not just U.S. history. Precedes each document and event with a concise but thorough introduction that explains its background and significance, places it in its proper historical context, and conveys the flavor and fervor of the developments that surrounded it. For anyone interested in the history of the Cold War.

Target America Steven J. Zaloga, 1993-06-01 Provides a detailed examination of how the former Soviet Union became a superpower. Takes the reader step by step through the development of Soviet nuclear weapons technology and the development of the systems needed to deliver those weapons to targets in the U.S. Drawing on secret, recently declassified Soviet documents and articles as well as recent revelations from KGB and CIA files, Zaloga sheds new light on the role of Klaus Fuchs and the Rosenbergs, the so-called atomic spies of the late 40s and early 50s. A chapter on the 1962 Cuban missile crisis provides a unique perspective on that critical Cold War showdown. Photos.
