In addition to an introductory appraisal of current SLCR as well as a wake up call reminding us that learner corpus design still needs to be improved, this volume features a selection of original studies ranging from general issues concerning learner corpora compilation to more specific aspects such as phonetic, lexical, grammatical and pragmatic features of the interlanguage of learners of Spanish as reflected in corpus data. This volume will undoubtedly be of significant interest to researchers involved in corpus linguistics, second language acquisition research as well as to professionals in the field of Spanish as a second language including teachers and creators and publishers of teaching materials.

*The Cambridge Handbook of English Corpus Linguistics* Douglas Biber, Randi Reppen, 2015-06-25 The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus based linguistic research on English including chapters on collocations, phraseology, grammatical variation, historical change and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus based studies in this area with discussion of what those studies found and why they are important. Each chapter also includes a critical discussion of the corpus based methods employed for research in this area as well as an explicit summary of new findings and discoveries.

**Adverbs and Adverbials** Olivier Duplâtre, Pierre-Yves Modicom, 2022-06-21 Adverbs seem to raise unsolvable issues for theories of word classes both crosslinguistically and language internally. The contributions in this volume all address this categorial problem from a variety of formal and functional points of view. In the first part, current definitions of the class for Romance and Germanic languages are being questioned and improved drawing on data from English, German and Italian. The second part is devoted to adverbial scope in Romance, French, Italian and Brazilian Portuguese, Germanic, Modern Greek and Chinese under special consideration of modal adverbs, subject oriented manner adverbs and domain adverbs and adverbials. Syntactic and semantic relationships appear to lay the ground for a robust and fine grained functional definition of adverbs and adverbials.
