## **Problems And Snapshots From The World Of Probability:**

*Problems and Snapshots from the World of Probability* Gunnar Blom, Lars Holst, Dennis Sandell, 2012-12-06 We the authors of this book are three ardent devotees of chance or some what more precisely of discrete probability When we were collecting the material we felt that one special pleasure of the field lay in its evocation of an earlier age many of our probabilistic forefathers were dexterous solvers of discrete problems We hope that this pleasure will be transmitted to the readers The first problem book of a similar kind as ours is perhaps Mosteller's well known *Fifty Challenging Problems in Probability* 1965 Possibly our book is the second The book contains 125 problems and snapshots from the world of probability A problem generally leads to a question with a definite answer A snapshot is either a picture or a bird's eye view of some probabilistic field The selection is of course highly subjective and we have not even tried to cover all parts of the subject systematically Limit theorems appear only seldom for otherwise the book would have become unduly large We want to state emphatically that we have not written a textbook in probability but rather a book for browsing through when occupying an easy chair Therefore ideas and results are often put forth without a machinery of formulas and derivations the conscientious readers who want to penetrate the whole clockwork will soon have to move to their desks and utilize appropriate tools

**The Best Writing on Mathematics 2013** Mircea Pitici, 2014-01-19 The year's finest writing on mathematics from around the world with a foreword by Nobel Prize winning physicist Roger Penrose This annual anthology brings together the year's finest mathematics writing from around the world Featuring promising new voices alongside some of the foremost names in the field *The Best Writing on Mathematics 2013* makes available to a wide audience many articles not easily found anywhere else and you don't need to be a mathematician to enjoy them These writings offer surprising insights into the nature meaning and practice of mathematics today They delve into the history philosophy teaching and everyday occurrences of math and take readers behind the scenes of today's hottest mathematical debates Here Philip Davis offers a panoramic view of mathematics in contemporary society Terence Tao discusses aspects of universal mathematical laws in complex systems Ian Stewart explains how in mathematics everything arises out of nothing Erin Maloney and Sian Beilock consider the mathematical anxiety experienced by many students and suggest effective remedies Elie Ayache argues that exchange prices reached in open market transactions transcend the common notion of probability and much much more In addition to presenting the year's most memorable writings on mathematics this must have anthology includes a foreword by esteemed mathematical physicist Roger Penrose and an introduction by the editor Mircea Pitici This book belongs on the shelf of anyone interested in where math has taken us and where it is headed
