How Philosophers Argue Fernando Leal, Hubert Marraud, 2022-02-21 This volume presents a double argumentative analysis of the debate between Bertrand Russell and Frederick Copleston on the existence of God It includes an introduction justifying the choice of text and describing the historical and philosophical background of the debate It also provides a transcript of the debate based in part on the original recording The argumentative analyses occupy Parts I and II of the book In Part I the argumentative process is analysed by means of the ideal model of critical discussion the workhorse of pragma dialectics Part I shows how the two parties go through the four stages of a critical discussion It highlights the questions raised over and beyond the presiding question of whether God exists and examines almost a hundred questions that are raised Many are left in the air whereas a few others give rise to sundry sub discussions or meta dialogues In Part II the theoretical framework of argument dialectic is put to work argument structures are identified by means of punctuation marks argumentative connectors and operators allowing to see the argumentative exchange as the collaborative construction of a macro argument Such a macro argument is both a joint product of the arguers and a complex structure representing the dialectical relationships between the individual arguments combined in it Finally the complementarity of the two approaches is addressed Thus the book can be described as an exercise in adversarial collaboration

[Buddhism As Philosophy](#) Mark Siderits, 2021-10-06 In Buddhism As Philosophy Mark Siderits makes the Buddhist philosophical tradition accessible to a Western audience Offering generous selections from the canonical Buddhist texts and providing an engaging analytical introduction to the fundamental tenets of Buddhist thought this revised expanded and updated edition builds on the success

of the first edition in clarifying the basic concepts and arguments of the Buddhist philosophers Unapologetic John W. Loftus, 2016-11-01 A forceful takedown of faith based reasoning in secular institutions Just as intelligent design is not a legitimate branch of biology in public educational institutions nor should the philosophy of religion be a legitimate branch of philosophy argues acclaimed author John W Loftus In his call for ending the philosophy of religion he argues that as it is presently being practiced the main reason the discipline exists is to serve the faith claims of Christianity Most of philosophy of religion has become little more than an effort to defend and rationalize preexisting Christian beliefs By highlighting the stark differences between faith based reasoning and evidence based reasoning Loftus presents vital arguments and lessons about the importance of critical thinking not only in all aspects of study but also in life His conclusions and recommendations thus resonate far beyond the ivory towers and ivy covered walls of academic institutions For atheists secular individuals and those interested in critical thinking about religion *Mapping Scientific Method* Gita Chadha, Renny Thomas, 2022-07-19 This volume explores how the scientific method enters and determines the dominant methodologies of various modern academic disciplines It highlights the ways in which practitioners from different disciplinary backgrounds the humanities the natural sciences and the social sciences engage with the scientific method in their own disciplines The book maps the discourse within each of the disciplines that critiques the scientific method from different social locations in order to argue for more complex and nuanced approaches in methodology It also investigates the connections between the method and the structures of power and domination which exist within these disciplines In the process it offers a new way of thinking about the philosophy of the scientific method Part of the Science and Technology Studies series this volume is the first of its kind in the South Asian context to debate scientific methods and address questions by scholars based in the global south It will be useful to students and practitioners of science humanities social sciences philosophy of science and philosophy of social science Research scholars from these disciplines especially those engaging in interdisciplinary research will also benefit from this volume **Doing Philosophy** Timothy Williamson, 2018-06-13 What are philosophers trying to achieve How can they succeed Does philosophy make progress Is it in competition with science or doing something completely different or neither Timothy Williamson tackles some of the key questions surrounding philosophy in new and provocative ways showing how philosophy begins in common sense curiosity and develops through our capacity to dispute rationally with each other Discussing philosophy's ability to clarify our thoughts he explains why such clarification depends on the development of philosophical theories and how those theories can be tested by imaginative thought experiments and compared against each other by standards similar to those used in the natural and social sciences He also shows how logical rigour can be understood as a way of enhancing the explanatory power of philosophical theories Drawing on the history of philosophy to provide a track record of philosophical thinking's successes and failures Williamson overturns widely held dogmas about the distinctive nature of philosophy in comparison to the sciences demystifies its methods and considers the future of the

discipline From thought experiments to deduction to theories this little book will cause you to totally rethink what philosophy is
