Fuzzy Analytical Hierarchy Process Disposal Method:

Intelligence Systems in Environmental Management: Theory and Applications Cengiz Kahraman, İrem Uçal
Sari, 2016-09-03 This book offers a comprehensive reference guide to intelligence systems in environmental management. It provides readers with all the necessary tools for solving complex environmental problems where classical techniques cannot be applied. The respective chapters written by prominent researchers explain a wealth of both basic and advanced concepts including ant colony genetic algorithms, evolutionary algorithms, fuzzy multi criteria decision making tools, particle swarm optimization, agent based modelling, artificial neural networks, simulated annealing, Tabu search, fuzzy multi objective optimization, fuzzy rules, support vector machines, fuzzy cognitive maps, cumulative belief degrees and many others. To foster a better understanding, all the chapters include relevant numerical examples or case studies. Taken together, they form an excellent reference guide for researchers, lecturers and postgraduate students pursuing research on complex environmental problems. Moreover, by extending all the main aspects of classical environmental solution techniques to its intelligent counterpart, the book presents a dynamic snapshot on the field that is expected to stimulate new directions and stimulate new ideas and developments.

Plastic Waste Management Kalim Deshmukh, Jyotishkumar Parameswaranpillai, 2024-03-11
Plastic Waste Management: Comprehensive resource on innovative and breakthrough developments in plastic waste management covering a wide range of processing techniques and applications. Plastic Waste Management offers a complete guide to the best plastic waste management practices through recycling, incineration, landfill and other processes, discusses applications of plastic waste management including energy generation, biochemical production, construction and food packaging, covering current challenges relating to plastic waste, explaining the sources of waste and their routes into the environment and providing systematic coverage of plastic waste treatment methods including mechanical processing, monomerization, blast furnace feedstock gasification and thermal recycling. The book also discusses different biodegradation mechanisms of plastic wastes and ecotoxicity and ecological implications of marine plastic debris. From a cultural perspective, the book provides information regarding environmental and health implications, societal issues and current challenges associated with plastic waste management. Written by leading experts in the field and edited by two highly qualified academics, Plastic Waste Management covers specific sample topics such as:
A roadmap towards a circular economy and environmental sustainability via effective management strategies for plastic wastes.
Implementation of an analytical hierarchy process for developing better waste collection systems and chemical recycling of plastic waste for sustainable development.
Mechanisms, perspectives and challenges for natural biodegradation of plastic wastes and conversion of plastic wastes into value added materials.
Plastic wastes management and disposal in developing countries and challenges and strategies for plastic waste management during and post COVID 19 pandemic.
Plastic Waste Management is a highly valuable resource for scientists and researchers working in the fields of environmental science, environmental engineering and plastic engineering.

towards the goal of developing sustainable materials along with graduate and postgraduate students in related programs of study and professionals and engineers in related industries

Civil Engineering and Energy-Environment Vol 2 Qingfei Gao,Zhenhua Duan,2023-06-16 Civil Engineering and Energy Environment focuses on the research of civil engineering environment resources and energy materials This proceedings gathers the most cutting edge research and achievements aiming to provide scholars and engineers with preferable research direction and engineering solution as reference Subjects in this proceedings include Engineering Structure Environmental Protection Materials Architectural Environment Environment Resources Energy Storage Building Electrical Engineering The works of this proceedings will promote development of civil engineering and environment engineering Thereby promote scientific information interchange between scholars from top universities research centers and high tech enterprises working all around the world
