The Index of Training Films B.S. Inc, The Classical Animated Documentary and Its Contemporary Evolution Cristina Formenti,2022-03-24 The Classical Animated Documentary and Its Contemporary Evolution is the first book to provide an historical insight into the animated documentary Drawing on archival research and textual analysis it shows how this form usually believed to be strictly contemporaneous instead took shape in the 1940s Cristina Formenti integrates a theoretical and a historical approach in order to shed new light on the animated documentary as a form as well as on the work of renowned studios such as The Walt Disney Studios Halas Batchelor National Film Board of Canada and never before addressed ones such as Corona Cinematografica She also highlights the differences and the similarities existing among the animated documentaries created between the 1940s and the mid 1980s and those produced today so as to demonstrate how the latter do not represent a complete otherness in respect to the former but rather an evolution Animation Chris Pallant,2021-01-01 Animation Critical and Primary Sources is a major multi volume work of reference that brings together seminal writings on animation studies Gathering historical and contemporary texts from a wide ranging number of sources the volumes provide a key resource in understanding and studying the past and future directions of animation studies The four volumes thematically trace animation studies from its many definitions or a lack thereof to the institutional nature of animation production to establishing greater space within animation discourse for the consideration of broadcast and interactive animation and finally giving greater contextual understanding of the field of animation studies by focusing on Authorship Genre Identity Politics and Spectatorship thus enabling readers to engage more deeply with the ideas discussed in the final volume Ordering the collection in this way avoids imposing an overly simplistic chronological framework thereby allowing debates that have developed over years and even decades to stand side by side Each volume is separately introduced and the essays structured into coherent sections on specific themes *Thermal Engineering Studies with Excel, Mathcad and Internet* Valery Ochkov,Konstantin Orlov,Volodymyr Voloshchuk,2016-02-05 This book provides the fundamentals of the application of mathematical methods modern computational tools Excel Mathcad SMath etc and the Internet to solve the typical problems of heat and mass transfer thermodynamics fluid dynamics energy conservation and energy efficiency Chapters cover the technology for creating and using databases on various properties of working fluids coolants and thermal materials All calculation methods are provided with links to online computational pages where data can be inserted and recalculated It discusses tasks involving the generation of electricity at thermal nuclear gas turbine and combined cycle power plants as well as processes of co and trigeneration conditioning facilities and heat pumps This text engages students and researchers by using modern calculation tools and the Internet for thermal engineering applications *The Index of Training Films* Business Screen Magazine,1951 **25 Problems for STEM Education** Valery Ochkov,2020-01-31 25 Problems for STEM Education introduces a new and emerging course for undergraduate STEM
