Eterno, Arvind Verma, Eli B. Silverman, 2022-09-30 This edited collection illuminates the weaknesses and strengths of crime reporting across a wide range of countries with a focus on democratic countries in which the police bear some accountability to citizens In one compendium for the first time this book documents how different countries record or fail to record crimes With chapters written by native authors who are experts on the practices of their respective countries the book explores practices in 15 different countries across the globe Organized with a parallel country by country approach the book describes and analyzes methods police use to record crimes with the awareness that the counting of crimes is not only an issue of empirical measurement but also one of social construction Crime reporting practices vary widely by country In some cases reports are not taken and in others reports are carefully based on preliminary investigations Willful manipulation of crime reports can and does occur and the book explores related factors such as political pressure personal ambition community safety and more Discussion questions at the end of each chapter help the reader evaluate the significant issues influencing each country The editors conclude by suggesting best practices for crime reporting and the collection of crime data A unique addition to this book is a foreword by Tofiq Murshudlu the Head of Drugs and Crime for the United Nations in Vienna The book is intended for a wide range of audiences including policing scholars law enforcement and community leaders and

David Harrison Assistant Professor of Linguistics Swarthmore College,2007-02-01 It is commonly agreed by linguists and anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime The phenomenon known as language death has started to accelerate as the world has grown smaller This extinction of languages and the knowledge therein has no parallel in human history K David Harrison s book is the first to focus on the essential question what is lost when a language dies What forms of knowledge are embedded in a language s structure and vocabulary And how harmful is it to humanity that such knowledge is lost forever Harrison spans the globe from Siberia to North America to the Himalayas and elsewhere to look at the human knowledge that is slowly being lost as the languages that express it fade from sight He uses fascinating anecdotes and portraits of some of these languages last remaining speakers in order to demonstrate that this knowledge about ourselves and the world is inherently precious and once gone will be lost forever This knowledge is not only our cultural heritage oral histories poetry stories etc but very useful knowledge about plants animals the seasons and other aspects of the natural world not to mention our understanding of the capacities of the human mind Harrison s book is a testament not only to the pressing issue of language death but to the remarkable span of human knowledge and ingenuity It will fascinate linguists anthropologists and general readers      *Global trends* Ingomar Hauchler,Paul M.
