Basic Civil Engineering Tech Max:

Hydraulic and Civil Engineering Technology VIII Mijia Yang, Pijush Samui, João C.G. Lanzinha, Jianhui Hu, 2023-12-15

All of us are dependent on a built environment constructed and maintained by civil and hydraulic engineers and for those working in these fields keeping up to date with the latest technological developments is vital for the safe and efficient design and operation of this infrastructure. This book presents the proceedings of HCET 2023, the 8th International Technical Conference on Frontiers of Hydraulic and Civil Engineering Technology, held from 25-27 September 2023 in Wuhan, China. HCET is an international conference which aims to enhance the development of hydraulic and civil engineering in China with a focus on high-end intelligent and green technologies. It seeks to do this by consolidating global wisdom and achievements and providing scientific support. HCET also offers an excellent opportunity for scientists, researchers, and engineers from around the world to exchange their findings and discuss developments, establishing a basis for national and international collaboration. A total of 316 contributions were received for the 2023 edition, of which 187 were ultimately accepted after a rigorous review process and checks for quality and plagiarism. Topics covered include the research and development of concrete structure design and analysis, structural mechanics and structural engineering, building and future materials, hydraulic engineering, geological exploration and earthquake engineering, building technology, urban planning, road, bridge and traffic engineering, energy infrastructure, environmental engineering, and advanced engineering technologies and interdisciplinary sciences and applications. Covering a wide range of subjects related to hydraulic engineering and civil engineering technology and associated transdisciplinary sciences, the book will be of interest to all those working in the field.

Hydraulic and Civil Engineering Technology VII Mijia Yang, João C.G. Lanzinha, Pijush Samui, Xingxian Bao, Jianhui Hu, 2022-12-15. Engineering technology is of crucial importance to the infrastructure on which modern societies depend, and keeping abreast of the latest research and developments in the field is of vital importance. This book presents the proceedings of HCET 2022, the 7th International Technical Conference on Frontiers of Hydraulic and Civil Engineering Technology, originally due to be held in Sanya, China, from 25-27 September 2022 but instead held as a fully virtual event on Zoom due to continued uncertainty related to the COVID-19 pandemic. HCET is a platform for the dissemination of research results on the latest advances in the areas of hydraulic and civil engineering technology and environmental engineering and provides an opportunity for scientists, researchers, and engineers from around the world to exchange their findings, discuss developments, and possibly establish a basis for collaboration. A total of 275 submissions were received from international contributors, and all were subjected to a rigorous peer review process, with each paper reviewed by a minimum of two experts. Papers were also checked for quality and plagiarism, after which 163 papers were accepted for presentation and publication. Topics covered include the research and development of concrete structure design and analysis, structural mechanics and structural engineering, geological exploration and earthquake engineering, building technology, urban planning, energy, environment, and

advanced engineering science and applications The book offers a state of the art overview of recent developments and will be of interest to all those working in the fields of hydraulic and civil engineering technology **Hydraulic and Civil**
