*INCEESS 2020* Putri Anggun Sari, Ikhsan Romli, Mohammad Hatta Fahamsyad, Retno Purwani Setyaningrum, Lisa Kustina, 2021-01-18 InCEESS is an international conference hosted by Pelita Bangsa University. This conference is arranged to become an annual conference making room for scholars and practitioners in the area of Engineering, ICT Management, and all research in Social Science and Humanities to share their thoughts, knowledge, and recent researches in the field of study. <https://inceeds.pelitabangsa.ac.id>

*Islamic Accounting And Finance: A Handbook* Khaled Hussainey, Hidayat Al Lawati, 2023-03-23 Islamic finance is one of the fastest growing sectors in international banking and finance. Owing to the increasing availability and ease of access to Islamic services, Islamic finance has become increasingly important not only in Muslim countries but around the world, making it a global industry. Under the Gulf Cooperation Council (GCC) as well as in some regions such as the Middle East and North Africa, a dual financial system is implemented where Sharia-compliant products are marketed alongside conventional financial systems. In this thoroughly researched collection of chapters, researchers from around the world examine the role of Islamic finance in the economies and prospects of different companies. They discuss Islamic finance literature from both theoretical and empirical perspectives. The theoretical section of the book consists of conceptual chapters that enable readers to critically evaluate and expand their understanding of accounting and finance. The chapters in the empirical section of this handbook discuss and interpret empirical evidence to provide clear implications for practice, research, and society. This section bridges the gap between theory and practice and offers suggestions for future research. *Islamic Accounting and Finance* is geared towards scholars and students but it is also of use to banking and finance practitioners.

*BISIC 2020* P. Parwito, P. Praningrum, Karona Cahya Susena, M. Yasser Iqbal Daulay, Robbi Rahim, 2021-05-11 The Faculty of Economics and Business, Bengkulu University (UNIB) Provinsi Bengkulu, Indonesia, organized the 3rd Beehive International Social Innovation Conference (BISIC 2020) on 3rd-4th Oct 2020 in Bengkulu, Indonesia. The number of participants who joined the Zoom room was recorded at 450 participants. Participants came from 4 countries, namely Indonesia, Malaysia, Philippines, and Thailand. BISIC 2020 is implemented with the support of a stable internet network system and a Zoom application. In the implementation, there were several technical obstacles encountered by the participants, namely the difficulty of joining the Zoom application due to the unstable internet signal. The holding of a virtual conference felt less meaningful due to the lack of interaction between speakers and participants. The BISIC 2020 committee presented and discussed 30 papers. The papers were authored by researchers from Thailand, Malaysia, Philippines, and Indonesian. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections and thereafter contributed to the improvement of the quality of the papers.

Basic Principles of Structural Equation Modeling Ralph O. Mueller,2012-12-06 During the last two decades structural equation modeling SEM has emerged as a powerful multivariate data analysis tool in social science research settings especially in the fields of sociology psychology and education Although its roots can be traced back to the first half of this century when Spearman 1904 developed factor analysis and Wright 1934 introduced path analysis it was not until the 1970s that the works by Karl Joreskog and his associates e g Joreskog 1977 Joreskog and Van Thillo 1973 began to make general SEM techniques accessible to the social and behavioral science research communities Today with the development and increasing avail ability of SEM computer programs SEM has become a well established and respected data analysis method incorporating many of the traditional analysis techniques as special cases State of the art SEM software packages such as LISREL Joreskog and Sorbom 1993a b and EQS Bentler 1993 Bentler and Wu 1993 handle a variety of ordinary least squares regression designs as well as complex structural equation models involving variables with arbitrary distributions Unfortunately many students and researchers hesitate to use SEM methods perhaps due to the somewhat complex underlying statistical repre sentation and theory In my opinion social science students

and researchers can benefit greatly from acquiring knowledge and skills in SEM since the methods applied appropriately can provide a bridge between the theoretical and empirical aspects of behavioral research

**State of the Art in Partial Least Squares Structural Equation Modeling (PLS-SEM)** Lăcrămioara Radomir, Raluca Ciornea, Huiwen Wang, Yide Liu, Christian M. Ringle, Marko Sarstedt, 2023-09-15 This edited volume brings together some of the best papers from the 2022 Conference on Partial Least Squares Structural Equation Modeling PLS SEM held at the Babe Bolyai University Cluj Romania The volume seeks to expand the current research on PLS SEM and promote the method's application in the scientific community It gathers research from scholars in many different fields who work on the advancement of PLS SEM and who apply the method to explain and predict behavioral phenomena Researchers today can draw on a wide array of different PLS SEM based algorithms complementary methods and model evaluation metrics Tying in with these developments the first part of this book documents methodological advances of PLS SEM which extend the researchers current toolbox of methods The following parts demonstrate state of the art applications of PLS SEM in various fields such as consumer behavior hospitality human resource management entrepreneurship and organizational behavior Special emphasis is placed on studies that apply complementary methods to offer a more nuanced analysis of the research questions

*Structural Equation Modelling with Partial Least Squares Using Stata and R* Mehmet Mehmetoglu, Sergio Venturini, 2021-03-08 Partial least squares structural equation modelling PLS SEM is becoming a popular statistical framework in many fields and disciplines of the social sciences The main reason for this popularity is that PLS SEM can be used to estimate models including latent variables observed variables or a combination of these The popularity of PLS SEM is predicted to increase even more as a result of the development of new and more robust estimation approaches such as consistent PLS SEM The traditional and modern estimation methods for PLS SEM are now readily facilitated by both open source and commercial software packages This book presents PLS SEM as a useful practical statistical toolbox that can be used for estimating many different types of research models In so doing the authors provide the necessary technical prerequisites and theoretical treatment of various aspects of PLS SEM prior to practical applications What makes the book unique is the fact that it thoroughly explains and extensively uses comprehensive Stata plsem and R cSEM and plspm packages for carrying out PLS SEM analysis The book aims to help the reader understand the mechanics behind PLS SEM as well as performing it for publication purposes Features Intuitive and technical explanations of PLS SEM methods Complete explanations of Stata and R packages Lots of example applications of the methodology Detailed interpretation of software output Reporting of a PLS SEM study Github repository for supplementary book material The book is primarily aimed at researchers and graduate students from statistics social science psychology and other disciplines Technical details have been moved from the main body of the text into appendices but it would be useful if the reader has a solid background in linear regression analysis
