Murali Babu Communication Engineering:

Emerging Electronics and Automation, Volume 1 Mohan Kankanhalli, Sharad Bhartiya, P. S. Pravin, 2026-02-13 This book contains peer reviewed papers presented at the 3rd International Conference on Emerging Electronics Automation E2A 2024 It aims to compile the scientific exchanges that took place during the conference held at NIT Silchar India The proceedings highlight the latest scientific advancements and achievements in various emerging fields including instrumentation control signal processing communication and related computational techniques The book seeks to provide a global audience with updates novel findings and solutions to pressing challenges in these domains while also inspiring aspiring scientists to pursue meaningful research The field of instrumentation spans multiple disciplines such as electronics computation automation microelectronic technology nanomaterials and biomedical engineering applications As such this publication is expected to appeal to a diverse audience across the scientific and engineering communities International Conference on Innovative Computing and Communications Deepak Gupta, Ashish Khanna, Aboul Ella Hassanien, Sameer Anand, Ajay Jaiswal, 2022-11-07 This book includes high quality research papers presented at the Fifth International Conference on Innovative Computing and Communication ICICC 2022 which is held at the Shaheed Sukhdev College of Business Studies University of Delhi Delhi India on February 19 20 2022 Introducing the innovative works of scientists professors research scholars students and industrial experts in the field of computing and communication the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real time applications **Proceedings of the 20th European Conference on Management, Leadership and Governance** Mafalda Patuleia, 2024 *Metal and Polymer Micro and Nano Composites* Murahari Kolli, J. Paulo Davim, 2025-12-29 With the rapid advancement in micro and nano scale composite technologies there is an increasing need to understand their mechanical thermal and structural behavior to design the next generation of materials for aerospace automotive biomedical and industrial applications The book is organized into twelve chapters each focusing on specific innovations and methods in micro and nano composites It begins with an introductory chapter on the basic concepts of micro and nano composites setting the stage for more complex evaluations in later chapters Then it delves into the mechanical and thermal properties of composites enhanced by graphene nanoparticles and explores hybrid composites using natural fibers like crab shell and jute The advancement of 3D printed composites specifically carbon fiber reinforced PLA is covered using the Taguchi method Subsequent chapters investigate the development of biocomposite materials using hemp kenaf and nut shell powders alongside studies on metal matrix composites wear characteristics and surface engineering using micro powders and nanoparticles Key topics like friction stir processing and the integration of micro metal particles in additive manufacturing provide insights into both fabrication techniques and material behavior The book also features research on hybrid composites such as titanium molybdenum and vanadium for agricultural applications and magnesium based materials
