**Inclusive, Smart and Sustainable Cities** Elwira Gross-Gniot, Zbigniew Makięła, Magdalena M. Stuss, Jacek Szołtysek, Grażyna Trzpiot, 2026-03-09 This book addresses critical issues for contemporary cities building their future presenting a cohesive narrative rooted in the diverse experiences of its authors and reflecting the systemic nature of urban environments The authors attribute the success of programming and implementing the development of future cities to the deliberate creation of stakeholder competencies primarily through the use of smart city tools It is assumed that over time these competencies will evolve both qualitatively and diversely with their co creation remaining a dynamic process due to shifts among stakeholders driven by migration natural population growth or decline and changes in stakeholder structures While urban communities differ significantly in various locations conditioned culturally politically economically etc the book argues that the mechanisms of smart cities can be unified due to available technological tools and methods of filtering big data for the needs of cognitive and decision making processes In this area international experiences of both cities and technology companies indicate the universality of solving problems of city functioning and the great ability to disseminate knowledge in this area The identified trends and applied conceptual approaches can serve as a benchmark for searching for smart city competences that serve the constant increase in the inclusiveness of cities The book will appeal to academics researchers and advanced students as well as policymakers and practitioners

Artificial Intelligence for Smart Health: Learning, Simulation, and Optimization Bing Yao, Nathan Gaw, Hyo Kyung Lee, 2025-03-07 With rapid developments in medical sensing and imaging we now live in an era of data explosion in which large amounts of data are readily available and accessible in the clinical environment The fast growing biomedical and healthcare data provide unprecedented opportunities for data driven scientific knowledge discovery and clinical decision support However it is widely acknowledged that biomedical and healthcare data contain high dimensions large volumes missing values imbalanced classes heterogeneous sources multi modalities and measurement noises These inherent features pose significant barriers to the translation of data into meaningful clinical actions Thus there arises an urgent and compelling need for the development of innovative machine learning simulation and optimization algorithms to cope with the unique challenges associated with biomedical and healthcare data facilitating the transformation of data into actionable insights for smart health Our Research Topic aims at catalyzing synergies among biomedical informatics machine learning computer simulation operations research systems engineering and other related fields with three specific goals 1 develop cutting edge data driven models to accelerate scientific knowledge discovery in biomedicine from medical and healthcare data collected from laboratory systems imaging systems and medical and sensing devices 2 develop advanced simulation and calibration algorithms to build personalized digital twins by effectively assimilating patient specific medical data with population level computer models facilitating

precision medical planning 3 develop innovative optimization algorithms for optimal medical decision making in the face of uncertainty factors conflicting objectives and complex trade offs This Research Topic will offer a timely collection of information to benefit the researchers and practitioners working in the broad fields of biomedical informatics healthcare data analytics medical image processing and health related artificial intelligence By harnessing the potential of machine learning computational simulation and mathematical optimization techniques healthcare professionals can effectively analyze and interpret the vast amount of biomedical data available to them which will ultimately lead to more accurate disease diagnosis personalized treatment plans and improved patient outcomes
