Multi-Agent Systems Adelinde M. Uhrmacher, Danny Weyns, 2018-10-08 Methodological Guidelines for Modeling and Developing MAS Based Simulations The intersection of agents modeling simulation and application domains has been the

subject of active research for over two decades Although agents and simulation have been used effectively in a variety of application domains much of the supporting research remains scattered in the literature too often leaving scientists to develop multi agent system MAS models and simulations from scratch Multi Agent Systems Simulation and Applications provides an overdue review of the wide ranging facets of MAS simulation including methodological and application oriented guidelines This comprehensive resource reviews two decades of research in the intersection of MAS simulation and different application domains It provides scientists and developers with disciplined engineering approaches to modeling and developing MAS based simulations After providing an overview of the field s history and its basic principles as well as cataloging the various simulation engines for MAS the book devotes three sections to current and emerging approaches and applications Simulation for MAS explains simulation support for agent decision making the use of simulation for the design of self organizing systems the role of software architecture in simulating MAS and the use of simulation for studying learning and stigmergic interaction MAS for Simulation discusses an agent based framework for symbiotic simulation the use of country databases and expert systems for agent based modeling of social systems crowd behavior modeling agent based modeling and simulation of adult stem cells and agents for traffic simulation Tools presents a number of representative platforms and tools for MAS and simulation including Jason James II SeSAM and RoboCup Rescue Complete with over 200 figures and formulas this reference book provides the necessary overview of experiences with MAS simulation and the tools needed to exploit simulation in MAS for future research in a vast array of applications including home security computational systems biology and traffic management

Software Architecture Knowledge Management Muhammad Ali Babar,Torgeir Dingsøy,Patricia Lago,Hans van der Vliet,2009-08-12

A software architecture manifests the major early design decisions which determine the system s development deployment and evolution Thus making better architectural decisions is one of the large challenges in software engineering Software architecture knowledge management is about capturing practical experience and translating it into generalized architectural knowledge and using this knowledge in the communication with stakeholders during all phases of the software lifecycle This book presents a concise description of knowledge management in the software architecture discipline It explains the importance of sound knowledge management practices for improving software

architecture processes and products and makes clear the role of knowledge management in software architecture and software development processes It presents many approaches that are in use in software companies today approaches that have been used in other domains and approaches under development in academia After an initial introduction by the editors the contributions are grouped in three parts on Architecture Knowledge Management Strategies and Approaches for Managing Architectural Knowledge and Tools and Techniques for Managing Architectural Knowledge The presentation aims at information technology and software engineering professionals in particular software architects and software architecture researchers For the industrial audience the book gives a broad and concise understanding of the importance of knowledge management for improving software architecture process and building capabilities in designing and evaluating better architectures for their mission and business critical systems For researchers the book will help to understand the applications of various knowledge management approaches in an industrial setting and to identify research challenges and opportunities
