A.,Connor, J.,2018-02-06 This book contains papers presented at the 1st International Conference on Timber Structures
which was held in collaboration with the Technical Centre of Wood Industry in Belgium It explores the latest developments in
wood products and their application as structural components The focus of the included works is to draw attention to new
research and real applications from both researchers and practitioners and to present new and innovative ideas in this
significant field Rapid advances have recently been made in the development and processing of innovative ecologically
friendly wood products A variation of new structural shapes can now be fabricated and used to construct buildings and
bridges which have minimal impact on the environment Wood is particularly appealing since it is renewable and has no
carbon footprint when it is harvested in a sustainable way Timber structures are ecologically sound and comparatively low
cost The material lends itself to ground breaking designs and new types of composites offer reliable robust and safe materials
