Kenneth Shultis, 2022-06-07 Exploring Monte Carlo Methods Second Edition provides a valuable introduction to the numerical methods that have come to be known as Monte Carlo This unique and trusted resource for course use as well as researcher reference offers accessible coverage clear explanations and helpful examples throughout Building from the basics the text also includes applications in a variety of fields such as physics nuclear engineering finance and investment medical modeling and prediction archaeology geology and transportation planning Provides a comprehensive yet concise treatment of Monte Carlo methods Uses the famous Buffon's needle problem as a unifying theme to illustrate the many aspects of Monte Carlo methods Includes numerous exercises and useful appendices on Certain mathematical functions Bose Einstein functions Fermi Dirac functions and Watson functions

Light Scattering Technology for Food Property, Quality and Safety Assessment Renfu Lu, 2017-11-22 Light Scattering Technology for Food Property Quality and Safety Assessment discusses the development and application of various light scattering techniques for measuring the structural and rheological properties of food evaluating composition and quality attributes and detecting pathogens in food The first four chapters cover basic concepts principles theories and modeling of light transfer in food and biological materials Chapters 5 and 6 describe parameter estimation methods and basic techniques for determining optical absorption and scattering properties of food products Chapter 7 discusses the spatially resolved measurement technique for determining the optical properties of food and biological materials whereas Chapter 8 focuses on the time resolved spectroscopic technique for measuring optical properties and quality or maturity of horticultural products Chapter 9 examines practical light scattering techniques for nondestructive quality assessment of fruits and vegetables Chapter 10 presents the theory of light transfer in meat muscle and the measurement of optical properties for determining the postmortem condition and textural properties of muscle foods and meat analogs Chapter 11 covers the applications of spatially resolved light scattering techniques for assessing quality and

safety of animal products Chapter 12 looks into light scattering for milk and dairy processing Chapter 13 examines the applications of dynamic light scattering for measuring the microstructure and rheological properties of food Chapter 14 shows the applications of a biospeckle technique for assessing the quality and condition of fruits and vegetables Chapter 15 provides a detailed description of Raman scattering spectroscopic and imaging techniques in food quality and safety assessment Chapter 16 the final chapter focuses on applications of light scattering techniques for the detection of food borne pathogens
