Writing at the State U: Instruction and Administration at ..., *Freedom to Learn* Bruce Macfarlane, 2016-08-12. The freedom of students to learn at university is being eroded by a performative culture that fails to respect their rights to engage and develop as autonomous adults. Instead, students are being restricted in how they learn, when they learn, and what they learn by the so-called student engagement movement. Compulsory attendance, registers, class contribution, grading, group project work, and reflective learning exercises based on expectations of self-disclosure and confession take little account of the rights of students or individual differences between them. This new hidden university curriculum is intolerant of students who may prefer to learn informally, are reticent, shy, or simply value their privacy. Three forms of student performativity have arisen: bodily, participative, and emotional, which threaten the freedom to learn. Key themes include: re-imagining of student academic freedom; the democratic student experience; challenging assumptions of the student engagement movement; an examination of university policies and practices. *Freedom to Learn* offers a radically new perspective on academic freedom from a student rights standpoint. It analyzes the effects of performative expectations on students, drawing on the distinction between negative and positive rights to re-frame student academic freedom. It argues that students need to be thought of as scholars with rights and that the phrase "student-centred learning" needs to be reclaimed to reflect its original intention to allow students to develop as persons. Student rights to non-indoctrination, reticence in choosing how to learn, and in being treated like an adult ought to be central to this process in fostering a democratic rather than authoritarian culture of learning and teaching at university. Written for an international readership, this book will be of great interest to anyone involved in higher education policy and practice, drawing on a wide range of historical and contemporary literature related to sociology, philosophy, and higher education studies. **Assessing Student Learning** Linda Suskie, 2018-01-09. *Assessing Student Learning* is a standard reference for college faculty and administrators, and the third edition of this highly regarded book continues to offer comprehensive, practical, plain-spoken guidance. The third edition adds a stronger emphasis on making

assessment useful greater attention to building a culture in which assessment is used to inform important decisions an enhanced focus on the many settings of assessment especially general education and co curricula a new emphasis on synthesizing evidence of student learning into an overall picture of an integrated learning experience new chapters on curriculum design and assessing the hard to assess more thorough information on organizing assessment processes new frameworks for rubric design and setting standards and targets and many new resources Faculty administrators new and experienced assessment practitioners and students in graduate courses on higher education assessment will all find this a valuable addition to their bookshelves *Catalog* University of Colorado Boulder,2002 **University Catalog Issue ...**

Lehigh University,1924 **Catalog** Pikes Peak Community College,2016 **Underserved Patrons in University Libraries** Julia C. Skinner,Melissa Gross,2021-01-12 This practical and research based volume focuses on how libraries can meet the needs of underserved patrons in college and university libraries with an emphasis on those facing trauma abuse and discrimination While university libraries strive to meet the needs of all students some groups have traditionally been overlooked This volume engages with those underserved populations on college campuses with an emphasis on those facing trauma abuse and discrimination It brings a variety of authorial voices to discuss different aspects of that service and to share current research related to underserved populations in libraries This combination supports research in LIS and beyond while offering concrete ways for service providers to make a difference in the lives of their patrons Editors Skinner and Gross have both conducted extensive research in ethically meeting patron needs They and their contributors are keenly aware of the complex and interwoven considerations that inform such service such as patron desire for confidentiality accompanied by an urgent need for assistance This volume is committed to sharing diverse voices in the field and to exploring the interrelationship between theoretical findings and practical applications all in the service of underserved patrons

Productivity in Higher Education Caroline M. Hoxby,Kevin Stange,2020-01-10 How do the benefits of higher education compare with its costs and how does this comparison vary across individuals and institutions These questions are fundamental to quantifying the productivity of the education sector The studies in *Productivity in Higher Education* use rich and novel administrative data modern econometric methods and careful institutional analysis to explore productivity issues The authors examine the returns to undergraduate education differences in costs by major the productivity of for profit schools the productivity of various types of faculty and of outcomes the effects of online education on the higher education market and the ways in which the productivity of different institutions responds to market forces The analyses recognize five key challenges to assessing productivity in higher education the potential for multiple student outcomes in terms of skills earnings invention and employment the fact that colleges and universities are multiproduct firms that conduct varied activities across many domains the fact that students select which school to attend based in part on their aptitude the difficulty of attributing outcomes to individual institutions when students attend more than one and the possibility that some

of the benefits of higher education may arise from the system as a whole rather than from a single institution The findings and the approaches illustrated can facilitate decision making processes in higher education
