Survival Analysis Using SAS Paul D. Allison, 2010-03-29 Easy to read and comprehensive Survival Analysis Using SAS A Practical Guide Second Edition by Paul D Allison is an accessible data based introduction to methods of survival analysis Researchers who want to analyze survival data with SAS will find just what they need with this fully updated new edition that incorporates the many enhancements in SAS procedures for survival analysis in SAS 9 Although the book assumes only a minimal knowledge of SAS more experienced users will learn new techniques of data input and manipulation Numerous examples of SAS code and output make this an eminently practical book ensuring that even the uninitiated become sophisticated users of survival analysis The main topics presented include censoring survival curves Kaplan Meier estimation accelerated failure time models Cox regression models and discrete time analysis Also included are topics not usually covered in survival analysis books such as time dependent covariates competing risks and repeated events

Survival Analysis Using SAS A Practical Guide Second Edition has been thoroughly updated for SAS 9 and all figures are presented using ODS Graphics This new edition also documents major enhancements to the STRATA statement in the LIFETEST procedure includes a section on the PROBLOT command which offers graphical methods to evaluate the fit of each parametric regression model introduces the new BAYES statement for both parametric and Cox models which allows the user to do a Bayesian analysis using MCMC methods demonstrates the use of the counting process syntax as an alternative method for handling time dependent covariates contains a section on cumulative incidence functions and describes the use of the new GLIMMIX procedure to estimate random effects models for discrete time data This book is part of the SAS Press program

**Longitudinal Structural Equation Modeling** Jason T. Newsom, 2023-10-31 Longitudinal Structural Equation Modeling is a comprehensive resource that reviews structural equation modeling SEM strategies for longitudinal data to help readers determine which modeling options are available for which hypotheses This accessibly written book explores a range of models from basic to sophisticated including the statistical and conceptual underpinnings that are the building blocks of the analyses By exploring connections between models it demonstrates how SEM is related to other longitudinal data techniques and shows when to choose one analysis over another Newsom emphasizes concepts and practical guidance for applied research rather than focusing on mathematical proofs and new terms are highlighted and defined in the glossary Figures are included for every model along with detailed discussions of model specification and implementation issues and

each chapter also includes examples of each model type descriptions of model extensions comment sections that provide practical guidance and recommended readings Expanded with new and updated material this edition includes many recent developments a new chapter on growth mixture modeling and new examples Ideal for graduate courses on longitudinal data analysis advanced SEM longitudinal SEM and or advanced data quantitative analysis taught in the behavioral social and health sciences this new edition will continue to appeal to researchers in these fields
