Intentions In Architecture:

Intentions in Architecture Christian Norberg-Schulz,1968-09-15 The chief focus of the book is on the symbolic and linguistic The purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art Norberg Schulz is a practicing architect his buildings stand in several countries and he elucidates the nature of architectural reality with a practiced eye and from a practical viewpoint Although the methods and theory that his book develops are uncompromisingly rigorous and tightly formed they are everywhere related to actual building through specific examples and through the use of over 100 photographs The structure that Norberg Schulz has fashioned is surely one of the most impressive intellectual edifices that any architect has ever produced The materials that are organically worked into it include Gestalt psychology the mechanics of perception information theory modern analytic philosophy and in particular linguistic analysis and the general theory of signs and symbols The result however is not an eclectic hodge podge all these materials have their place and purpose none is applied extraneously for show or purely decorative effect And all this divergent material had to be joined according to plan within formal bounds in order to produce a theory with equally divergent applications one that can treat not only of the aesthetics of architecture but equally well of its social psychological and cultural effects The chief focus of the book is on the symbolic and linguistic The purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art

Architecture History and

Theory in Reverse Jassen Callender, 2017-07-28 This book looks at architecture history in reverse in order to follow chains of precedents back through time to see how ideas alter the course of civilization in general and the discipline of architecture in particular Part I begins with present day attitudes about architecture and traces them back to seminal ideas from the beginning of the twentieth century Part II examines how pre twentieth century societies designed and understood architecture how they strove to create communal physical languages and how their disagreements set the stage for our information age practices *Architecture History and Theory in Reverse* includes 45 black and white images and will be useful to students of architecture and literature Self-organizing Coalitions for Managing Complexity Juan C.

Burguillo, 2017-12-13 This book provides an interdisciplinary approach to complexity combining ideas from areas like complex networks cellular automata multi agent systems self organization and game theory The first part of the book provides an extensive introduction to these areas while the second explores a range of research scenarios Lastly the book presents CellNet a software framework that offers a hands on approach to the scenarios described throughout the book In light of the introductory chapters the research chapters and the CellNet simulating framework this book can be used to teach undergraduate and master s students in disciplines like artificial intelligence computer science applied mathematics economics and engineering Moreover the book will be particularly interesting for Ph D and postdoctoral researchers seeking a general perspective on how to design and create their own models **Modern Architecture and the Critical Present** Kenneth Frampton, 1982
