Digital Cities III. Information Technologies for Social Capital: Cross-cultural Perspectives Peter van den Besselaar, Satoshi Koizumi, 2005-04-05 Digital cities constitutes a multidisciplinary field of research and development where researchers designers and developers of communityware interact and collaborate with social scientists studying the use and effects of these kinds of infrastructures and systems in

their local application context The field is rather young After the diffusion of ICT in the world of organizations and companies ICT entered everyday life And this also influenced ICT research and development The 1998 Workshop on Communityware and Social Interaction in Kyoto was an early meeting in which this emerging field was discussed After that two subsequent Digital Cities workshops were organized in Kyoto and a third one in Amsterdam This book is the result of the 3rd Workshop on Digital Cities which took place September 18 19 2003 in Amsterdam in conjunction with the 1st Communities and Technologies Conference Most of the papers were presented at this workshop and were revised thoroughly afterwards Also the case studies of digital cities in Asia the US and Europe included in Part I were direct offsprings of the Digital Cities Workshops Together the papers in this volume give an interesting state of the art overview of the field In total 54 authors from the Americas from Asia and from Europe were contributed to this volume The authors come from Brazil two the USA eleven China three Japan fourteen Finland two Germany two Italy three Portugal two the Netherlands eight and the UK seven indicating the international nature of the research field

Transforming Otherness Peter Nynas, 2017-07-28 Today people in different situations and contexts face intercultural challenges These are a result of increasing mobility Sometimes such challenges are brought about by crisis situations and an international labor market However people also come in contact with each other through forms of new technology such as the Internet and through literature and film In these multicultural encounters misunderstandings and sometimes clashes are experienced This volume presents studies in culture communication and language all of which strive through a variety of theoretical perspectives to develop understanding of such challenges and perhaps offer practical solutions Encountering otherness may evoke fears negative attitudes and a corresponding will to dismiss the otherness in front of us either consciously or unconsciously This denial of otherness may also be subtle Thinking about otherness as described in this volume also raises questions about how otherness is represented and mediated and about the possible role of third parties in facilitating communication in such situations Sometimes a third party can play a crucial role in facilitating the communication process and serve as a channel of communication Trust in humanity as a bridge to community requires a subtle balance between representations of self and other Various problems arise in intercultural mediation which may be caused by cultural and political differences and these are sometimes used to validate stereotypical beliefs and images The editors argue that in both academic and art circles European perspectives have widely been understood as universal

Teaching Interculturality 'Otherwise' Fred Dervin, Mei Yuan, Sude, 2022-12-14 This edited volume focuses on the thorny and somewhat controversial issue of teaching and learning interculturality in a way that considers the notion from critical and reflexive perspectives when introduced to students Comprised of three parts the book discusses the nuts and bolts of teaching interculturality considers changes in the teaching of interculturality and provides pedagogical insights into interculturalising the notion It studies both teaching explicitly about interculturality and how to incorporate interculturality into teaching practices or into an institution By sharing varied cases and theoretical

reflections on the topic the editors and contributors from different parts of the world aim to stimulate more initiatives to enrich the field instead of delimiting it especially in complement to and beyond the West or Global North and also to build up further reflexivity in the way readers engage with interculturality in education This will be a must read for teachers and researchers of intercultural communication education at different educational levels as well as anyone interested in scholarship on education for interculturality Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons 4.0 license

Lived Temporalities Julia Mahler, 2008

In contemporary global capitalist culture time consciousness becomes more important than self consciousness In the realm of lived time the identity of the self opens up to an encounter with otherness Insights into the ways in which this dynamic unfolds enable one to affirm human temporalities in their potential difference to the temporalities of global capitalism The book offers an empirical exploration of lived temporalities on markets in buses and in traditional subsistence in Guatemala and a theoretical exploration of these through the philosophy of Gilles Deleuze and inter relational approaches within psychoanalysis

Planning for Cultural Diversity Christine Inglis, 2008 How to ensure educational equality rights to cultural maintenance and full social participation of

minority groups while ensuring social harmony and national development within a democratic society is a major challenge for education policy makers. Traditionally this is viewed as a debate for pedagogues. Nevertheless there are important implications for educational planners and managers. Given the many varied patterns of ethnic diversity within individual societies and their different educational traditions no one set of educational responses is universally applicable. However as discussed in the booklet there are certain readily identifiable processes to follow in developing responses to cultural diversity. The three main foci of policy responses put forward are the organisation and structures of education, curricula, pedagogy and choice of language and relations between the school and the community.
