Politics Gorden Moyo, Sabelo J. Ndlovu-Gatsheni, 2025-04-10 Africa provides a unique perspective to understand today's global crises. This book explores how Africa, positioned historically in a subaltern role due to colonialism, offers a critical lens on the shifting dynamics of the modern world system. The book presents how Africa's continued struggles against racism, colonialism, and economic exploitation make it a powerful site for rethinking the global order. Addressing ecological, ideological, financial, health, and systemic crises, the book demonstrates how problems in Africa are intrinsically linked to global issues. It argues that the so-called decolonization after 1945 was superficial, maintaining global hierarchies that marginalize Africa. With insights from thinkers like Nkrumah and Rodney, it challenges the entrenched structures of racial capitalism and offers new pathways for genuine global equity and justice. This book will appeal to students, scholars, and researchers of international relations, economics, political science, and related disciplines, as well as policy makers interested in a better understanding of the ongoing global power shift and Africa's challenges and position within the modern world system.

**Multinational Financial Management** Alan C. Shapiro, 2003 This comprehensive book provides a conceptual framework within which key financial decisions of the multinational firm can be analyzed. The approach is to treat international financial management as a natural extension of financial management principles. Thus, it builds on the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance.

**Displaced by Disaster** Ann-Margaret Esnard, Alka Sapat, 2014-05-23 Displacement has traditionally been conceptualized as a phenomenon that results from conflict or other disruptions in developing or unstable countries. Hurricane Katrina shattered this notion and highlighted the various dilemmas of population displacement in the United States. The dilemmas stem from that of inconsistent terminology and definitions, lack of efforts to quantify displacement risk potential, and that factor displacement vulnerability into community plans, lack of understanding of differential needs of displacees, especially during long-term recovery periods, and policy and institutional responses, or lack thereof, especially as it relates to post-disaster sheltering and housing. Incorporating relevant examples, cases, and policies, Esnard and Sapat look at the experience of other countries and how the international community has dealt with hundreds of thousands of individuals who have been forced to leave their homes. *Displaced by Disaster* addresses such issues from a planning and policy perspective, informed by scholarship in disciplines such as emergency management, political science, sociology, and anthropology. It is ideal for students and practitioners working in the areas of disaster management, planning, public administration, and policy, housing, and the many disciplines connected to disaster issues.
