Novel insights in rehabilitation of neglect, 2nd Edition Stefan Van Der Stigchel, Tanja Nijboer, 2015-01-09 Hemispatial neglect is the failure to report respond to or orient to novel or meaningful stimuli presented in the contralesional visual field It constitutes one of the most invalidating neurological disorders that can occur after stroke It is therefore important to treat neglect as adequate as possible and much of the research dedicated to neglect therefore focuses on rehabilitation In this special topic you will find 29 articles on the rehabilitation of neglect This Research Topic has opened new perspectives and has given us an indication of where the field is going Although some of the current rehabilitation techniques have proven to be beneficial there is limited agreement on the most valuable technique or the mechanisms underlying the ameliorating effects

The ventricular-subventricular zone: a source of oligodendrocytes in the adult brain Oscar Gonzalez-Perez, Jose Manuel Garcia-Verdugo, Adan Aguirre, 2014-09-30 Demyelinating diseases are characterized by an extensive loss of oligodendrocytes and myelin sheaths from axolemma which commonly result in disability in young adults To date there is no effective treatment against these

neurological disorders In the adult brain there are neural stem cells NSCs that reside within a niche denominated ventricular subventricular zone V SVZ in the lateral wall of the cerebral ventricles NSCs give rise to neurons and oligodendrocytes that help preserve cellular homeostasis Growing evidence indicates that V SVZ progenitor cells may represent an endogenous source of oligodendrocytes that can be useful to treat demyelinating diseases This e Book The ventricular subventricular zone as a source of oligodendrocytes in the adult brain collected the most recent evidence regarding the mechanisms that modulate the proliferation migration quiescence cell fate choices and survival of oligodendrocyte precursors generated in the V SVZ Herein we compiled information about the role of Sonic hedgehog NMDA receptors ErbB proteins hemopressin erythropoietin osmolarity and microglia in the oligodendrocyte production Some chapters also describe the role of oligodendrocyte precursors in the preservation of cellular homeostasis aging and white matter repair All these information is presented as novel research findings short communications and review articles which were written by experts in the field of oligodendrocyte generation myelin production and white matter re myelination

Longitudinal Data Analysis Donald Hedeker, Robert D. Gibbons, 2012-07-06 This book presents and describes methods for analysis of longitudinal data with a strong emphasis on the application of these methods to problems in the biomedical and behavioral sciences This is an important book because longitudinal data are increasingly common in many areas of research and methods of analysis of such data are not well understood by data analysts Therefore the book is geared more toward users and not developers of statistics The Second Edition features six new chapters on Bivariate and Multivariate Models Growth Mixture Models Grouped and Discrete Time Survival Analysis Models Mixed effects Regression Models for Higher Level Data Intensive Longitudinal Data and Sample Size and Power Determination in Longitudinal Studies In addition the introductory chapter now describes the pertinent features of each presented dataset in an effort to streamline the presentation of the datasets The relevant variables of the datasets and the scientific aim of the studies are described Specific statistical procedures covered within the book include repeated measures analysis of variance multivariate analysis of variance for repeated measures random effects regression models RRM covariance structure models generalized estimating equations GEE models and generalizations of RRM and GE for categorical outcomes This book emphasizes methods for analysis of longitudinal data analysis which are extensively illustrated using real examples The authors have chosen not to focus on software in the book though some syntax examples are provided Many programs are available for the analyses presented in this book including

SAS SPSS SYSTAT HLM MLwiN MIXREG MIXOR and Mplus Several datasets and computer syntax examples are posted on the book's related website It is the aim of the authors to keep these syntax examples current as new versions of the software programs emerge

Comprehensive Clinical Psychology A.S. Bellack, Michel Hersen, 1998-08-20 [Statistical Modelling and Latent Variables](#) Klaus Haagen, David J. Bartholomew, Manfred Deistler, 1993 Statistical methods based on models with latent variables play an important role in the analysis of multivariate data The subject can be approached theoretically or in an empirical pragmatic way The statistical problem is to make inferences about the latent variables and the relationships between them Errors in variables models factor analysis and latent structure models are all examples of this approach This volume presents a selection of invited and contributed papers which address the problems involved in developing a unifying statistical theory for latent variable models
