Frank Adelstein, Sandeep KS Gupta, Golden Richard III, Loren Schwiebert, 2004-12-30 This book details the engineering principles underlying mobile computing, serving as a basic reference text for graduate and advanced undergraduates. It is the first systematic explanation of mobile communications as a discipline in itself, containing exercises, projects and solutions. *Human Computer Interaction: Concepts, Methodologies, Tools, and Applications*

Ang, Chee Siang, Zaphiris, Panayiotis, 2008-10-31 Penetrates the human-computer interaction (HCI) field with breadth and depth of comprehensive research. *Computerization Movements and Technology Diffusion*

Margaret S. Elliott, Kenneth L. Kraemer, 2008 Computerization movement (CM) refers to a special kind of social and technological movement that promotes the adoption of computing within organizations and society. Through theoretical analyses, systematic empirical studies, field-based studies and case studies of specific technologies, the book shows CMs to be driven by Utopian visions of technology that become part of the ether within society. The empirical studies presented here show the need for designers, users and the media to be aware that CM rhetoric can propose grand visions that never become part of a reality and reinforce the need for critical and scholarly review of promising new technologies. Back cover *Pervasive Computing*

Jochen Burkhardt, 2002 This book offers a complete introduction to pervasive computing, also known as mobile computing, ubiquitous computing, anywhere anywhen computing, etc. The book features case studies of applications and gives a broad overview of pervasive computing devices, standards, protocols, architectures. The book also covers and includes analysis and categorisation of existing technologies and solid information to help integrate pervasive computing applications into existing e-business applications. *Workshops Proceedings of the 5th International Conference on Intelligent Environments*

M. Schneider, A. Kröner, J.E. Alvarado, 2009-10-02 Advances in the engineering of sensing and acting capabilities distributed in wide range of specialized devices is providing at last an opportunity for the fundamental advances that computer science achieved in the past few decades to make an impact in our daily lives. This technical confluence is matched by a unique historical context where users are better informed, more aware of the benefits that technology can provide and production of more complex systems is becoming more affordable. Sensors, actuators deployed in an environment in this context, it can be any physical space like a house, office, classroom, car, street, etc. facilitate a link between an automated decision-making system connected to that technologically enriched space. This computing empowered environment enables the provision of an intelligent environment, i.e. a digital environment that proactively but sensibly supports people in their daily lives. This is an active area of research which is attracting an increasing number of professionals in academia and industry worldwide. The prestigious

5th International Conference on Intelligent Environments IE 09 is focused on the development of advanced intelligent environments and stimulates the discussion on several specific topics which are crucial to the future of the area As part of that five workshops were supported as part of IE 09 This volume is the combined proceedings of those five workshops Workshop on Digital Object Memories DOME 09 Workshop on RFID Technology concepts practices solutions RFID 09 Workshop on Artificial Intelligence Techniques for Ambient Intelligence AITAmI 09 Workshop on Ethical Design of Ambient Intelligence EDAmI 09 Workshop on Smart Offices and Other Workplaces SOOW 09 Mobile Social Networking Alvin Chin, Daqing Zhang, 2013-10-30 The use of contextually aware pervasive distributed computing and sensor networks to bridge the gap between the physical and online worlds is the basis of mobile social networking This book shows how applications can be built to provide mobile social networking the research issues that need to be solved to enable this vision and how mobile social networking can be used to provide computational intelligence that will improve daily life With contributions from the fields of sociology computer science human computer interaction and design this book demonstrates how mobile social networks can be inferred from users physical interactions both with the environment and with others as well as how users behave around them and how their behavior differs on mobile vs traditional online social networks **Inventive Computation Technologies** S. Smys, Robert Bestak, Álvaro Rocha, 2019-11-02 With the intriguing development of technologies in several industries along with the advent of ubiquitous computational resources there are now ample opportunities to develop innovative computational technologies in order to solve a wide range of issues concerning uncertainty imprecision and vagueness in various real life problems The challenge of blending modern computational techniques with traditional computing methods has inspired researchers and academics alike to focus on developing innovative computational techniques In the near future computational techniques may provide vital solutions by effectively using evolving technologies such as computer vision natural language processing deep learning machine learning scientific computing and computational vision A vast number of intelligent computational algorithms are emerging along with increasing computational power which has significantly expanded the potential for developing intelligent applications These proceedings of the International Conference on Inventive Computation Technologies ICICT 2019 cover innovative computing applications in the areas of data mining big data processing information management and security **Risk Assessment and Management in Pervasive Computing** Varuna Godara, 2009-01-01 This book provides extensive information about pervasive computing its implications from operational legal and ethical perspective so that current and future pervasive service providers can make responsible decisions about where when and how to use this technology Provided by publisher **Smart Phone and Next Generation Mobile Computing** Pei Zheng, Lionel Ni, 2010-07-19 This in depth technical guide is an essential resource for anyone involved in the development of smart mobile wireless technology including devices infrastructure and applications Written by researchers active in both academic and industry settings it offers both a big
