New Directions in Wireless Communications Systems Athanasios G. Kanatas, Konstantina S. Nikita, Panagiotis (Takis) Mathiopoulos, 2017-10-16 Beyond 2020 wireless communication systems will have to support more than 1 000 times the traffic volume of today's systems. This extremely high traffic load is a major issue faced by 5G designers and researchers. This challenge will be met by a combination of parallel techniques that will use more spectrum more flexibly, realize higher spectral efficiency, and densify cells. Novel techniques and paradigms must be developed to meet these goals. The book addresses diverse key point issues of next generation wireless communications systems and identifies promising solutions. The book's core is concentrated to techniques and methods belonging to what is generally called radio access network.

The Vehicle Routing Problem: Latest Advances and New Challenges Bruce L. Golden, S. Raghavan, Edward A. Wasil, 2008-07-20 Theoretical research and practical applications in the field of vehicle routing started in 1959 with the truck dispatching problem posed by Dantzig and Ramser. 1. The optimum routing of a fleet of gasoline delivery trucks between a bulk terminal and a large number of service stations supplied by the terminal. Using a method based on a linear programming formulation, their hand calculations produced a near optimal solution with four routes to a problem with twelve service stations. The authors proclaimed. No practical applications of the method have been made as yet. In the nearly 50 years since the Dantzig and Ramser paper appeared, work in the field has exploded dramatically. Today a Google Scholar search of the words vehicle routing problem VRP yields more than 21 700 entries. The June 2006 issue of OR MS Today provided a survey of 17 vendors of commercial routing software whose packages are currently capable of solving average size problems with 1 000 stops, 50 routes, and two hour hard time windows in two to ten minutes. 2. In practice, vehicle routing may be the single biggest success story in operations research. For example, each day 103 500 drivers at UPS follow computer generated routes. The drivers visit 7.9 million customers and handle an average of 15.6 million packages. 3. **FCC Record** United States.
