Experiential Learning Cecilia Ka Yuk Chan,2022-09-29 Chan s book explores the challenges in assessing experiential learning  
deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning  
Experiential learning has been studied and proven to be effective for student learning particularly for the development of  
holistic competencies i e 21st century skills soft skills transferable skills considered essential for individuals to succeed in the  
increasingly global and technology infused 21st century society Universities around the world are now actively organising  
experiential learning activities or programmes for students to gain enriching and diversified learning experiences however  
the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education  
policies and students approach to learning But do educators know how to assess less traditional learning such as service  
learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current  
assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law  
languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do  
we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this  
book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering  
a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical  
and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in  
experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in  
experiential learning for example reflection is often used in assessing students in experiential learning but how reflection  
literate are educators are they aware of the ethical dilemmas that arise in assessing students These questions are discussed  
in detail The volume also introduces a quality assurance programme to recognise student development within experiential  
learning programmes The book will be particularly informative to academic developers teachers students and community  
partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in  
experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular
