**Hamiltonian Perturbation Solutions for Spacecraft Orbit Prediction** Martín Lara, 2021-05-10 Analytical solutions to the orbital motion of celestial objects have been nowadays mostly replaced by numerical solutions but they are still irreplaceable whenever speed is to be preferred to accuracy or to simplify a dynamical model In this book the most common orbital perturbations problems are discussed according to the Lie transforms method which is the de facto standard in analytical orbital motion calculations Due to an oversight an error slipped in Section 4.1 of the book where it is implicitly assumed the case of the Kepler problem The following text should replace Sections 4.1 and 4.2 of the book Cross references may be affected with the new writing In particular former crossed references to Eq 4.3 should now point to current Eq 4.12 Please find the Erratum below

**Strategic Applications of Measurement Technologies and Instrumentation** Palchoudhury, Soubantika, 2018-12-07 Measurement techniques form the basis of scientific engineering and industrial innovations The methods and instruments of measurement for different fields are constantly improving and it is necessary to address not only their significance but also the challenges and issues associated with them Strategic Applications of Measurement Technologies and Instrumentation is a collection of innovative research on the methods and applications of measurement techniques in medical and scientific discoveries as well as modern industrial applications The book is divided into two sections with the first focusing on the significance of measurement strategies in physics and biomedical applications and the second examining measurement strategies in industrial applications Highlighting a range of topics including material assessment measurement strategies and nanoscale materials this book is ideally designed for engineers academicians researchers scientists software developers graduate students and industry professionals
