Popper Selections Karl R. Popper, David W. Miller, Sir Karl Raimund Popper, 1985 These excerpts from the writings of Sir Karl Popper are an outstanding introduction to one of the most controversial of living philosophers known especially for his devastating criticisms of Plato and Marx and for his uncompromising rejection of inductive reasoning David Miller a leading expositor and critic of Popper's work has chosen thirty selections that illustrate the profundity and originality of his ideas and their applicability to current intellectual and social problems Miller's introduction demonstrates the remarkable unity of Popper's thought and briefly describes his philosophy of critical rationalism a philosophy that is distinctive in its emphasis on the way in which we learn through the making and correcting of mistakes Popper has relentlessly challenged both the authority and the appeal to authority of the most fashionable philosophies of our time This book of selections from his nontechnical writings on the theory of knowledge the philosophy of science metaphysics and social philosophy is imbued with his emphasis on the role and by reason in exposing and eliminating the errors among them **Popper Selections**

Karl Raimund Popper, 1974 *Fallibilist Solutions to Institutional Problems* John Wettersten, 2022-03-04 Since Karl Popper's fallibilist portrayal of scientific methodology in the 1940s critical rationalism has developed in many ways and in many fields However some of these developments still leave deep and important possibilities open One of these is the portrayal of all rational actions as social This book elucidates the significance of this perspective in regard to psychology political and social philosophy the understanding of how scientists can better communicate and strategies for better living The importance of the social theory of rationality for psychology arises above all due to the numerous assumptions made in psychological research that rationality is strictly individualist This is at hand for example in its historical portrayal and in important aspects of cognitive psychology As shown here these assumptions have damaging consequences for the relationship of rationality with cognitive and social psychology **Reflection Without Rules** D. Methods, Methodologies, and Perspectives in the Humanities and Social Sciences With Particular Reference to Islamic Studies: A Critical Rationalist Interpretation Ali Paya, 2021-01-01 This book presents the first comprehensive introduction to methods and methodologies in the humanities and social sciences in general and Islamic Studies in particular from a critical rationalist point of view The book aims to be a self-sufficient theoretical and practical guide to the topics that it introduces It contains a large selection of fully worked out review activities and review questions plus topics for further discussion which are devised to assist readers to better understand the issues which are discussed in the book Last but not least all efforts have been made to make sure that most if not all of the reading materials which are recommended in the book are not only of the highest quality but also freely available on the

Tautological Oxymorons John D. Brey,2002-06-25 Following in the fted footsteps of Heidegger and Nietzsche Jacques Derrida set out to complete the process of deconstructing Western metaphysics But something remarkable happened on the way to dismantling the Forum As if by grand design Derrida s deconstruction of Western metaphysics morphed into the ultimate justification for the apophatic negative theology that undergirds Western metaphysics In reaction to this inadvertent justification of negative theology Derrida embarked on a decade long confrontation with negative theology Most objective observers of the confrontation would be hard pressed not to feel that rather than deconstruction deconstructing apophatic theology instead and quite irreverently apophatic theology appears to have absorbed and incorporated the vocabulary of Derrida s deconstruction into the very language it uses to justify its presuppositions Having more than staved off the attack by Derrida s deconstruction it may now be time to turn the sword in the opposite direction If deconstruction is easily absorbed into the apophatic behemoth supporting Western metaphysics what would happen if Western metaphysics applied

deconstruction to the modern scientific materialism which acts as the cornerstone of the worldview setting itself in opposition to Western metaphysics Tautological Oxymorons is an attempt to deconstruct the language and logic used to present scientific materialism as though it were a viable alternative to pre Enlightenment theology philosophy and mythology By examining modern scientific materialism in the light of language and proper language use we can see that much that is taken for granted as obvious and a mere given within the context of scientific materialism is rather when carefully examined in the context of precise language usage nothing more than sheer unadulterated absurdity **Karl Popper** Jean Baudouin,1989 *The Journal of Philosophy* ,1997 **Learning, Teaching and Education Research in the 21st Century** Joanna Swann,2011-12-15 Learning Teaching and Education Research in the 21st Century draws on Karl Popper's evolutionary epistemology and challenges widespread assumptions about learning teaching and research that are embedded in the practices of many teachers and in the design of most education institutions worldwide Joanna Swann argues that to promote the growth of learning we need to encourage children and adolescents to exercise and develop creativity and criticality and that we need to provide and maintain environments in which they can safely engage in self initiated and self directed exploratory activity In accessible and engaging language the author presents philosophical arguments that support the defence and development of non authoritarian approaches to learning and teaching that can be used by individuals and groups working in or outside state funded schools In particular she provides tried and tested guidelines for student initiated curricula and a problem based methodology for professional development and action research [Educational Research in Practice](#) Joanna Swann,John Pratt,2004-09-19 Offering valuable insights into the education and social research community eight researchers representing contrasting approaches from the United Kingdom New Zealand and North America explain what they do why they do it its methodological basis and perceived outcomes Main themes are then analyzed and discussed by the editors both experienced teachers of research methodology and methods *The Philosophy and Methodology of Economics* Bruce J.
