Applied Economics Deped:

Growing Smarter World Bank, 2018-04-13 One quarter of the world's school age children live in East Asia and Pacific. During the past 50 years some economies in the region have successfully transformed themselves by investing in the continuous upgrading of the knowledge skills and abilities of their workforce. Through policy foresight they have produced graduates with new levels of knowledge and skills almost as fast as industries have increased their demand for skilled workers. Yet the success of these high performing systems has not been replicated throughout the region. Tens of millions of students are in school but not learning and as many as 60 percent of students remain in school systems that are struggling to escape from the global learning crisis or in systems where performance is likely poor. Many students in these systems fail to reach basic levels of proficiency in key subjects and are greatly disadvantaged because of it. Growing Smarter Learning and Equitable Development in East Asia and Pacific focuses on the experiences of economies in the region that have been able to expand schooling and learning and showcases those that have managed to pursue successful education reforms at scale. By examining these experiences the report provides both diagnoses and detailed recommendations for improvement not only for education systems within East Asia and Pacific but also for countries across the globe. In East Asia and Pacific the impressive record of success in education in some low and middle income countries is proof of concept that schooling in resource constrained contexts can lead to learning for all. This report identifies the policies and practices necessary to ensure that students learn and suggests how countries can improve learning outcomes. Learning & Living in the 21st Century i for H.s.' 2007 Ed. , *Rapport sur le développement dans le monde 2018* World Bank, 2018-07-24 Chaque année le Rapport sur le développement dans le monde de la Banque mondiale met en vedette un sujet d'importance capitale pour le développement mondial. Le Rapport sur le développement dans le monde 2018 APPRENDRE pour réaliser la promesse de l'éducation est le premier consacré généralement à l'éducation. Et le moment s'y prête particulièrement : l'éducation a toujours été essentielle au bien-être de l'être humain mais elle l'est plus encore en cette période de rapides mutations économiques et sociales. Le meilleur moyen de préparer les enfants et les jeunes à l'avenir est de placer l'apprentissage au centre de toutes les interventions de promotion de l'éducation. Le Rapport sur le développement dans le monde 2018 aborde quatre thèmes majeurs. La promesse de l'éducation. L'éducation est un levier important pour réduire la pauvreté et promouvoir une prospérité partagée. Mais pour qu'elle puisse réaliser ce potentiel il faut améliorer les politiques éducatives comme en dehors du système éducatif. La nécessité de mettre l'apprentissage en lumière. En dépit des progrès accomplis en matière d'accès à l'éducation les récentes évaluations des acquis scolaires révèlent que de nombreux jeunes travers le monde particulièrement ceux qui sont issus des couches pauvres ou marginalisées de la population quittent l'école sans avoir acquis les compétences nécessaires à la vie. En même temps des évaluations scolaires comparables sur le plan international montrent que les compétences disponibles dans de nombreux pays à revenu intermédiaire sont nettement inférieures à ce que ces pays ambitionnent. Et trop souvent ces lacunes

sont cachés par conséquent pour faire face à la crise de l'apprentissage il est crucial de commencer par la mettre en lumière en améliorant l'évaluation des acquis des élèves Comment mettre l'école au service de l'ensemble des apprenants Les travaux de recherche sur le cerveau l'innovation pédagogique et la gestion des établissements scolaires entre autres ont identifié des interventions qui favorisent l'apprentissage en faisant en sorte que les apprenants soient mieux préparés que les enseignants soient la fois compétents et motivés et que d'autres moyens soient mis en œuvre pour soutenir la relation entre l'enseignant et l'apprenant Comment faire en sorte que le système favorise l'apprentissage Pour réaliser les objectifs d'apprentissage travers le système éducatif dans son ensemble il ne suffit pas de transposer plus grande échelle les interventions efficaces Les pays doivent aussi surmonter des obstacles techniques et politiques en ayant recours des outils de mesure et indicateurs suffisamment parlants pour mobiliser les acteurs concernés et suivre les progrès en formant des coalitions au service de l'apprentissage et en adoptant une approche de réforme évolutive

[Economics of the Reversal in Gender Disparities in Education and Development](#) Masayoshi Okabe, 2025-09-30 This book examines the background and consequences of the reversal in gender disparities in education through the case of the Philippines While global education and development discourse has long emphasized girls disadvantage a reversal where boys are falling behind in education has also recently emerged in a number of countries in developing contexts This book critically investigates this issue in the Philippines hailed as the top runner of gender equality in Asia and the Pacific where boys especially those from poorer households and in rural areas are increasingly falling behind Drawing on data from three provinces across the archipelago's main regions Luzon Visayas and Mindanao the book empirically traces the background and consequences of the reversal in family dynamics and school environments amid poverty and uneven development It reveals that boys' educational disengagement cannot be understood independently of broader socioeconomic structures While girls may outperform boys in education labor market and familial systems often continue to disadvantage women recursively shaping boys' educational disengagement Through the lens of intergroup heterogeneity this book offers an in-depth examination of the nature of the reversal The economics of reversal is thus used not merely to describe but to rigorously interrogate surface level shifts that may obscure deeper enduring asymmetries The book adopts an interdisciplinary approach combining development economics education and area studies aiming to bridge econometric rigor and field-based contextual sensitivity It is intended for scholars educators policymakers and students interested in evolving patterns of education and development This volume presents an expanded and refined development of the author's earlier research which was awarded the Main Prize at the 19th Asia Pacific Research Prize Iue Prize conferred by the Asia Pacific Forum Awaji Conference Japan
