Field Programmable Gate Arrays (FPGAs) II George Dekoulis,2020-09-09 This Edited Volume Field Programmable Gate Arrays FPGAs II is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of Computer and Information Science The book comprises single chapters authored by various researchers and edited by an expert active in the Computer and Information Science research area All chapters are complete in itself but united under a common research study topic This publication aims at providing a thorough overview of the latest research efforts by international authors on Computer and Information Science and open new possible research paths for further novel developments *Advances in Data and Information Sciences* Mohan L. Kolhe,Shailesh Tiwari,Munesh C.

Trivedi,Krishn K. Mishra,2020-01-02 This book gathers a collection of high quality peer reviewed research papers presented at the 2nd International Conference on Data and Information Sciences ICDIS 2019 held at Raja Balwant Singh Engineering Technical Campus Agra India on March 29 30 2019 In chapters written by leading researchers developers and practitioner from academia and industry it covers virtually all aspects of computational sciences and information security including central topics like artificial intelligence cloud computing and big data Highlighting the latest developments and technical solutions it will show readers from the computer industry how to capitalize on key advances in next generation computer and communication technology **Emerging Technologies in Intelligent Applications for Image and Video Processing**

Santhi, V.,Acharjya, D. P.,Ezhilarasan, M.,2016-01-07 Image and Video Processing is an active area of research due to its potential applications for solving real world problems Integrating computational intelligence to analyze and interpret information from image and video technologies is an essential step to processing and applying multimedia data Emerging Technologies in Intelligent Applications for Image and Video Processing presents the most current research relating to multimedia technologies including video and image restoration and enhancement as well as algorithms used for image and video compression indexing and retrieval processes and security concerns Featuring insight from researchers from around the world this publication is designed for use by engineers IT specialists researchers and graduate level students *6G Enabled Fog Computing in IoT* Mohit Kumar,Sukhpal Singh Gill,Jitendra Kumar Samriya,Steve Uhlig,2023-10-01

Over the past few years the demand for data traffic has experienced explosive growth thanks to the increasing need to stay online New applications of communications such as wearable devices autonomous systems drones and the Internet of Things IoT continue to emerge and generate even more data traffic with vastly different performance requirements With the COVID 19 pandemic the need to stay online has become even more crucial as most of the fields would they be industrial educational economic or service oriented had to go online as best as they can As the data traffic is expected to continuously strain the capacity of future communication networks these networks need to evolve consistently in order to keep up with the growth of data traffic Thus more intelligent processing operation and optimization will be needed for tomorrow s communication

networks The Sixth Generation 6G technology is latest approach for mobile systems or edge devices in terms of reduce traffic congestions energy consumption blending with IoT devices applications The 6G network works beyond the 5G B5G where we can use various platforms as an application e g fog computing enabled IoT networks Intelligent techniques for SDN network 6G enabled healthcare industry energy aware location management Still this technology must resolve few challenges like security IoT enabled trust network This book will focus on the use of AI ML based techniques to solve issues related to 6G enabled networks their layers as well as their applications It will be a collection of original contributions regarding state of the art AI ML based solutions for signal detection channel modeling resource optimization routing protocol design transport layer optimization user application behavior prediction 6G enabled software defined networking congestion control communication network optimization security and anomaly detection The proposed edited book emphasis on the 6G network blended with Fog IoT networks to introduce its applications and future perspectives that helps the researcher to apply this technique in their domain and it may also helpful to resolve the challenges and future opportunities with 6G networks
