Applied Physics for Engineers P.K. Diwan, 2014 Swift Heavy Ions for Materials Engineering and Nanostructuring
Devesh Kumar Avasthi, Girijesh Kumar Mehta, 2011-05-24 Ion beams have been used for decades for characterizing and analyzing materials. Now energetic ion beams are providing ways to modify the materials in unprecedented ways. This book highlights the emergence of high energy swift heavy ions as a tool for tailoring the properties of materials with nanoscale structures. Swift heavy ions interact with materials by exciting ionizing electrons without directly moving the atoms. This opens a new horizon towards the so-called soft engineering. The book discusses the ion beam technology emerging from the non-equilibrium conditions and emphasizes the power of controlled irradiation to tailor the properties of various types of materials for specific needs. **Indian Journal of Pure & Applied Physics**, 2005 Bioelectronics Anuj Kumar, Ram K. Gupta, 2022-12-08 Bioelectronics is emerging as a new area of research where electronics can selectively detect, record, and monitor physiological signals. This is a rapidly expanding area of medical research that relies heavily on multidisciplinary technology development and cutting-edge research in chemical, biological, engineering, and physical science. This book provides extensive information on the i) fundamental concepts of bioelectronics ii) materials for the developments of bioelectronics such as implantable electronics, self-powered devices, bioelectronic sensors, flexible bioelectronics, etc. and iii) an overview of the trends and gathering of the latest bioelectronic progress. This book will broaden our knowledge about newer technologies and processes used in bioelectronics. Radiation Effects in Polymeric Materials Vijay Kumar, Babulal Chaudhary, Vishal Sharma, Kartikey Verma, 2019-02-09 This book provides an introduction of how radiation is processed in polymeric materials, how material properties are affected, and how the resulting materials are analyzed. It covers synthesis, characterization, or modification of important materials, e.g., polycarbonates, polyamides, and polysaccharides using radiation. For example, a complete chapter is dedicated to the characterization of biodegradable polymers irradiated with low and heavy ions. This book will be beneficial to all polymer scientists in the development of new macromolecules and to all engineers using these materials in applications. It summarizes the fundamental knowledge and latest innovations in research fields from medicine to space. Green Antibacterial Materials Chaudhery Mustansar Hussain, Kabali Vijai Anand, Shadpour Mallakpour, 2025-10-01 Green Antibacterial Materials: Eco-friendly Synthesis, Performance, and Applications presents the latest developments in this important research field. It provides comprehensive coverage of the various types of green antibacterial materials that are currently available. The book emphasizes sustainable synthesis techniques, practical applications, and future perspectives and delves into the fundamental concepts of antibacterial materials, exploring their mechanisms of action and the challenges associated with their conventional options. This book will be a valuable reference resource for researchers, materials scientists, and other professionals. Sections discuss a wide range of green antibacterial materials, including natural sources such as plant extracts and marine organisms, biopolymers derived from renewable

resources metal based compounds carbon based materials and hybrid combinations Each material type is thoroughly discussed highlighting their unique properties synthesis techniques and mechanisms of antibacterial activity Additionally the book enables readers to explore and develop sustainable solutions for various applications Presents the latest perspectives and recent developments on green antibacterial materials Highlights various eco friendly synthesis techniques Explores applications of green antibacterial materials in healthcare food packaging environmental applications and in textiles
