## CHAPTER 8

# CONCRETE STRUCTURES AND FOUNDATIONS<sup>1</sup>

---

### FOREWORD

The material in this chapter is written with regard to typical North American Railroad Concrete Structures and Foundations and other related structures and systems.

- Nonbearing Walls
- Typical Road Structures (paved and bridge supports) and
- Types of Bridge (up to 100 spans and girders) under spans through.

Additional special provisions for spans higher than those listed above may be added to the Chapter Appendices.

This chapter is presented in 2 volumes. Volume 1 is a practical compendium of railroad bridge construction being designed and constructed processes and design, materials, and manufacturing. Concrete Structures and Foundations used for railroads. The recommendations provided herein are based upon best available design, materials, and construction practices. These recommendations are intended for general use and might not provide sufficient criteria for unusually demanding conditions. Professional judgement must be exercised when applying the recommendations of this chapter as part of an overall solution to any particular case.

This chapter is published separately, incorporating no other parts of the previous code. The first published edition of this chapter should be used, regardless of the type of the existing structure. The provision of preliminary technical recommendations under which no existing structure was built from their publication and revision, if any, are needed to maintain previous editions of the chapter. However, when technical recommendations differ from the recommendations contained in the more published editions of the chapter, the recommendations of the latest published edition of the chapter should be used.

Part 8, Road (Open) Concrete Bridges, was deleted from the current (1975) Part 8, Roadway Structures, Chapter and deleted from the current (1975) Part 11, Structures for Main Line. Part 11, Structures Bridge Structures was added to Chapter 11 in 1984.

<sup>1</sup> The scope of the separate chapters in this volume should be fully understood in relation to recommendations regarding construction practices and materials to be used. Some recommendations are intended for general use and might not provide sufficient criteria for unusually demanding conditions. Professional judgement must be exercised when applying the recommendations of this chapter as part of an overall solution to any particular case. The recommendations of the latest published edition of the chapter should be used.
