

## Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a polynomial function. Explain.

2. Identify each of the functions below that are **not** polynomials. Explain why each is not a polynomial. **Hint:** Look at the behavior of each graph when you get really far to the right or left.

This is being bounded when the x gets the same direction

3. Graph each of the functions part 2 on the grid below using the grid you have available. If you think a function is not a polynomial, explain why it is not.

Remember, the functions that are not polynomials are bounded when the x goes really far in either direction. They are bounded when x goes to positive or negative infinity.
