Database Dreaming Volume I C. J. Date, 2022-02-11 Along with its companion volume Database Dreaming Volume II this book offers a collection of essays on the general topic of relational databases and relational database technology Most of those essays though not all have been published before but only in journals and magazines that are now hard to find or in books that are now out of print Here's a lightly edited excerpt from the preface so this is the author speaking I went back and reviewed all of those early essays looking for ones that seemed worth reviving or rather revising and reviving at this time Of course some of them definitely weren't However out of a total of around 130 original papers I did find some 20 or so that seemed to me worth preserving and hadn't already been incorporated in or superseded by more recent books of mine So I tracked down the original versions of those 20 or so papers and set to work When I was done though I found I had somewhere in excess of 600 pages on my hands too much in my view for just one book and so I split them across two separate volumes Highlights of the present

volume include a discussion of the difficulties involved in providing a relational interface to a nonrelational system a tutorial on the quantifiers and what happens to them under three valued logic an examination of the effect of user defined types on optimization some thoughts on normalization and database design tools and caveats regarding certain important database operators especially outer join and negation
