Wichers, 2016-03-10 Buildings are neither conceived nor realized by architects in a vacuum the architect forms part of a larger team of builders craftsmen engineers and other experts who join forces to bring together their diverse fields of knowledge This book describes the design and development of the building process for the wings at the Yitzhak Rabin Centre in Tel Aviv and demonstrates how collaborative building technical design and development can lead in an integrated and innovative but risky process to an extreme innovation an Octatube Moonshot The challenge posed by the Rabin Centre wings was to develop an entirely novel technology for constructing free form shells It is necessary for many disciplines to collaborate in such a process and these must be coordinated throughout the entire process including all of its unforeseen and experimental stages The results of the process then have to be integrated into one technical artifact that satisfies all requirements and delivers effective answers or compromises in all of its life phases be that conceptual design material design detail design engineering production assembly installation loading behavior functional use as a building meaning of the building as an artifact even as architecture and in both its local and global context in its meaning as an integral part of the building Auravana Habitat System Auravana, 2022-07-12 This publication is the Habitat System for a community type society A habitat a k a city town is a material operational service environment where humans live and have their needs fulfilled It is a service composed of interacting material objects This habitat system standard identifies the services technologies components and processes that compose a habitat service system A habitat service system encodes and expresses humanity s decided material fulfillment services When a decision resolves into a service that service is specified to exist in the habitat system Different configurations of a habitat lead to different levels and qualities of fulfillment The coherent integration and open visualization of the habitat system is important for human requirements to be met at the local and global level through scientific planning This standard represents the encoding of decisions into a global habitat service system with many local configurations of habitat that act together as a fulfillment platform for the whole community population The visualization and simulation of humanity s interconnected habitat systems is essential for maintaining a set of complex fulfillment oriented constructions and operations that meet human fulfillment requirements This publication details what has been what is and what could be constructed in the material environment It depicts through language and symbols visualization and simulation a habitat service environment consisting of life technology and exploratory support services For anything that is to be constructed in the material system there is a written part a drawing part and a simulation part which is also how the material system is sub divided Further all habitats are designed and operated by means of master planning they all have a master plan **Report - University of Illinois Board of Trustees** University of Illinois (System).
