

Writing an Art History Paper

By Maureen Gardely '12

Writing about art is based on the same analytical principles used for literature or history, but it requires a different approach and different observational skills. In an art history paper, we must employ a visual vocabulary and translate our visual impressions into a concrete verbal articulation. While this kind of writing can take many forms, the ultimate goals of any art history paper should be to explain the relationship between the technical form of a work and its impression on the viewer and to articulate how the visual elements work together to convey an overall effect.

There are several basic ways to write about art:

I. Formal Analysis:

A formal analysis is the fundamental form of writing about art and often the first taught in any introductory art history course. In a strict formal analysis, no other information is required besides that which you can see, and while some knowledge of the subject matter helps, your focus should be on the visual elements of a work. A formal analysis focuses on aspects like line, color, composition, and style, and describes the effect of these artistic decisions on the viewer. While any formal analysis must employ a good deal of description, it is important to remember that even a pure formal analysis must always be thesis-driven and each point should tie back to the overall interpretation of the work.

Example of a short formal analysis:

In Raphael's *Marriage of the Virgin*, the artist uses one point perspective, balanced composition, and vibrant primary colors to convey a sense of stability and order, thus representing the Christian narrative in the idealized, harmonious aesthetic of the Renaissance. In the foreground, a man and woman stand on either side of a central figure, their adjoining heads creating a focal point which extends back to the doorway on the horizon line. The orthogonal lines created by the tiled pavement move the viewer's eye along the same central path and emphasize the perfect perspective of the scene. The deep tones of yellow and green in the central man's clothing complement the red and blue in the woman's, and form the palette for the rest of the artwork; a simple, pure combination of colors that contributes to the sense of order. The almost perfect symmetry of the scene, as well as the relatively empty middle ground, underscores both the spiritual theme and the aesthetic values of the time.

Note how the writer balances description of the work, using a vocabulary based on knowledge of artistic techniques and visual elements, with analysis of their effect on the viewer. The thesis (in bold) provides a framework for the rest of the paragraph and acts as the driving force behind the descriptive observations.

The example above merely demonstrates the type of writing typically employed in a formal analysis and is therefore shorter and less thorough than most visual analyses. Also

Abstracts of Papers Delivered in Art History Sessions College Art Association of America. Meeting,2000 *Digital Art History* Anna Bentkowska-Kafel,Trish Cashen,Hazel Gardiner,2005 This book looks at the transformation that Art and Art history is undergoing through engagement with the digital revolution Since its initiation in 1985 CHArt Computers and the History of Art has set out to promote interaction between the rapidly developing new Information Technology and the study and practice of Art It has become increasingly clear in recent years that this interaction has led not just to the provision of new tools for the carrying out of existing practices but to the evolution of unprecedented activities and modes of thought This collection of papers represents the variety innovation and richness of significant presentations made at the CHArt Conferences of 2001 and 2002 Some show new methods of teaching being employed making clear in particular the huge advantages that IT can provide for engaging students in learning and interactive discussion It also shows how much is to be gained from the flexibility of the digital image or could be gained if the road block of copyright is finally overcome Others look at the impact on collections and archives showing exciting ways of using computers to make available information about collections and archives and to provide new accessibility to archives The way such material can now be accessed via the internet has revolutionized the search methods of scholars but it has also made information available to all However the internet is not only about access Some papers here show how it also offers the opportunity of exploring the structure of images and dealing with the fascinating possibilities offered by digitisation for visual analysis searching and reconstruction Another challenging aspect covered here are the possibilities offered by digital media for new art forms One point that emerges is that digital art is not some discreet practice separated from other art forms It is rather an approach that can involve all manner of association with both other art practices and with other forms of presentation and enquiry demonstrating that we are witnessing a revolution that affects all our activities and not one that simply leads to the establishment of a new discipline to set alongside others
