Social Studies Education in South and South East Asian Contexts Kerry J Kennedy, 2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them **Contested Curriculum** Don Romesburg, 2025-04-15 Today many states have proposed so called Don t Say Gay bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom But a few states like California have taken decisive steps in the other direction They mandate inclusive education that treats LGBTQ history as essential to the curriculum At once a history of an evolving movement and an activist handbook *Contested Curriculum* navigates the rocky path to LGBTQ inclusive K 12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California s landmark FAIR Education Act in 2011 ensuring that LGBTQ history has a place in the K 12 classroom Historian Don Romesburg the lead scholar who worked with advocacy organizations to pass the act recounts the decades long struggle to integrate LGBTQ content into history education policy textbooks and classrooms Looking at California and states that followed its lead he assesses the challenges and opportunities presented by this new way of teaching history Romesburg s powerful case for LGBTQ inclusive education is all the more urgent in this era of anti gay book bans regressive legislation and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation **Key to the Branom Practice Tests in Geography** Mendel Everett Branom, 1926 **Get Out Now** Mary Rice Hasson, Theresa Farnan, 2018-08-14 Should we stay or should we go Millions of parents with children in public schools can t believe they re asking this question But they are And you should be asking it too Almost overnight America s public schools have become morally toxic And they are especially poisonous for the hearts and minds of children from religious families of every faith ordinary families who value traditional morality and plain old common sense Parents first duty is to their children to their intellect their character their souls The facts on the ground point to one conclusion get out now **Perspectives of Black**

Histories in Schools LaGarrett J. King, 2019-11-01 This book examines the state of k 12 Black history education exploring its foundation curriculum pedagogy policy and psychology It brings together diverse scholars to discuss what Black history is and how it should be taught highlighting the progress made and the challenges that remain Advances in Geoethics and Groundwater Management : Theory and Practice for a Sustainable Development Manuel Abrunhosa, António Chambel, Silvia Peppoloni, Helder I. Chaminé, 2021-03-30 This book gathers the peer reviewed proceedings of the 1st congress on Geoethics Groundwater Management GEOETH GWM 20 held in Porto Portugal in an online format on 18 22 May 2020 Hosted in School of Engineering ISEP Polytechnic of Porto based on Porto city a UNESCO World Heritage Site the international conference focused on what has now been dubbed hydrogeoethics a novel transdisciplinary scientific field integrating all dimensions of geoethics in groundwater science and practice Given its scope the book is of interest to all researchers and practitioners in the geosciences hydrology water resources hydrogeology natural resources management environment engineering law sociology education philosophy culture among others This joint congress is the result of a collaborative agreement between the IAH International Association of Hydrogeologists and IAPG International Association for Promoting Geoethics and reflects the need for concerted actions to achieve sustainable development The diversity scale significance and increasing magnitude of anthropogenic interactions with aquifers and groundwater which often involve conflicting values or interests call for analysis discussions and decisions on the part of the agents involved e g groundwater scientists policymakers managers organisations professionals and citizens This approach calls for a responsible sustainable and human approach to groundwater use and management The groundwater community involved in the exploration and exploitation use and management of this increasingly vital natural resource is becoming more and more aware that ethical issues pervade all our attitudes from concept to action and need to be addressed Diverse values and cultures science and education law and policies human and natural environments and the public and the economic sectors view groundwater and its value and or role differently The authors believe that in a globalised and interconnected world common ground must be found in the interest of peace human development and sustainability The main topics covered here include 1 Fundamentals of hydrogeoethics cultures principles and geoethical values on groundwater science and engineering 2 Lessons for a resilient and sustainable future with hydrogeoethics case studies of geoethics in groundwater science engineering profession and management 3 Scientific and humanistic components of hydrogeoethics in groundwater education and professional training 4 Socio hydrogeology and ethical groundwater management 5 Geoethics of decision making under uncertainty and ethical issues in neglecting groundwater functioning 6 Groundwater geological legal social and ethical challenges of a unique natural resource **Social cohesion in Gauteng** Richard Ballard, Christian Hamann, Kate Joseph, Thembani Mkhize, 2019-03-14 Increasing attacks on foreigners including in April 2015 along with a succession of widely publicised incidents of racism have triggered a new round of soul searching in South Africa Why after the comprehensive defeat of

apartheid and its ideology does prejudice seem so intractable What kinds of interventions could help reduce these troubling events How can society be made more cohesive Suggestions about what to do in the face of these challenges are sometimes speculative and wishful They consist of appeals to the better nature of ordinary people or an assumption that the feel good moments of the democratic transition can be re enacted to bind everyone together Calls for social cohesion and tolerance seem often to dodge the complex vicious cycles that lead to the instances of intolerance that erupt in the media or in communities This Research Report centres on better understanding the current dynamics of social cohesion in Gauteng It tackles five guiding questions each of which corresponds to a chapter 1 How has social cohesion become a goal in post apartheid South Africa and what are the key limitations resulting from this understanding of social progress 2 In a global context how is social cohesion defined and what are the main contestations about this ideal of social change 3 How do the respondents in the GCRO s Quality of Life IV 2015 16 survey respond to questions on levels of trust claims to belonging by different race groups and the place of migrants and gays and lesbians in Gauteng 4 How have past and present initiatives to improve social cohesion conceived of the problem they are attempting to address and what is their scale of intervention 5 What are the various methodologies that have been used in past and present initiatives to improve social cohesion A key premise of this research was that our society has an enormous accumulation of experience in trying to tackle anti social interactions and to address social injustices that are in various ways shaped by race class nationality gender sexuality and other identities The last two chapters of this report are based on a review of more than 60 social cohesion initiatives They analyse the wide variety of actors involved in such work the different ways in which they conceive of their objectives and the different scales at which they operate These actors pursue dozens of different methodologies including sports and dialogue arts psychology urban design and public campaigns This dispersed capacity through society is important because it represents experience based responses to the ways in which anti social behaviour and social injustice are reproduced In attempting to determine a programme of action we argue that we should learn from and extend existing and past attempts to tackle these difficulties
