Policies and Programs for Sustainable Energy Innovations Tugrul U. Daim, Jisun Kim, Ibrahim Iskin, Rimal Abu Taha, Kevin C. van Blommestein, 2015-04-21 This volume features research and case studies across a variety of industries to showcase technological innovations and policy initiatives designed to promote renewable energy and sustainable economic development. The first section focuses on policies for the adoption of renewable energy technologies, the second section covers the evaluation of energy efficiency programs, and the final section provides evaluations of energy technology innovations. Environmental concerns, energy availability, and political pressure have prompted governments to look for alternative energy resources that can minimize the undesirable effects for current energy systems. For example, shifting away from conventional fuel resources and increasing the percentage of electricity generated from renewable resources such as solar and wind power is an opportunity to guarantee lower CO₂ emissions and to create better economic opportunities for citizens in the long run. Including discussions of such timely topics and issues as global warming, bio fuels, and nuclear energy, the editors and contributors to this book provide a wealth of insights and recommendations for sustainable energy innovations. Technology of Fluoropolymers Jiri G. Drobny, Sina Ebnesajjad, 2023-04-21 This third edition has been updated and expanded, providing industrial chemists, technologists, environmental scientists, and engineers with an accurate, compact, and practical source of information on fluoropolymers. Highlighting existing and new industrial, military, medical, and consumer goods applications, this edition adds more detailed information on equipment and processing conditions. It explores breakthroughs in understanding property-structure relationships, new polymerization techniques, and the chemistry underlying polymers such as melt-processable fluoroplastics. It also expands on the important properties of fluoropolymers, including heat and radiation degradation, health effects, and recycling. Features Revised, updated, and expanded to continue to provide an accurate, compact, and practical source of information on fluoropolymers. Explores the property-structure relationships, polymerization techniques, and the chemistry underlying polymers. Fluoropolymers rank high on the specialty polymers group and, due to their unique properties, are naturally part of the solution to the industrial sustainability challenges of the twenty-first century. Describes the technology of fluoropolymers, including thermoplastic and elastomeric products. Expands upon the important characteristics of fluoropolymers and their recycling.
