Reeds 21st Century Ship Management John W Dickie, 2014-04-17 The first modern title to cover the varied and complex world of ship management in the 21st century Ship management has constantly had to evolve to take into account the advancements in technology as well as the demands of the shipping industry Having internet access and email on board ship has meant that the ship manager has to possess certain sets of skills to function effectively in the post including computer literacy The emergence of large multi national ship management companies has also changed how

business is conducted and this in turn means that the ship manager and tiers of management within the organization have had to evolve to cope with the demands of working with a multi national workforce Furthermore since the mid 1980s there has been an ever expanding raft of legislation that is more restrictive for companies to meet and a shrinking of profit margins has seen a shift in how companies are required to operate to survive This book addresses the demands of 21st century ship management with the focus of the book as much on the people who manage ships as on the theory and practice of ship management *IMO News*, 2016

*Decision Modes in Complex Task Environments* Norbert Steigenberger,Thomas Lübcke,Heather Fiala,Alina Riebschläger,2017-05-25 Despite intense research on decision making in action we still know little about when decision makers rely on deliberate vs intuitive decision making in decision situations under complexity and uncertainty Building on default interventionist dual processing theory this book studies decision making modes deliberate vs intuitive in complex task environments contingent on perceived complexity experience and decision style preference We find that relatively inexperienced decision makers respond to increases in subjective complexity with an increase in deliberation and tend to follow their decision style preference Experienced decision makers are less guided by their decision preference and respond to increases in subjective complexity only minimally This book contributes to a developing stream of research linking decision making with intra personal and environmental properties and fosters our understanding of the conditions under which decision makers rely on intuitive vs deliberate decision modes In doing so we go one step further towards a comprehensive theory of decision making in action [Resolutions and Other Decisions](#)
