Gospel for the Outsider Patrick Whitworth, 2014-12-01 A useful study guide or resource for individuals and bible study groups who want to take a fresh look at familiar material This book looks again at Luke's writings from the point of view of reaching outsiders

The Importance of Outsiders to Pauline Communities Emma Louise Parker, 2024-06-13 This book argues that despite Paul's often dramatic and critical descriptions of non-Christians his letters reveal a deep concern for the presence of outsiders and for their opinion of Christians Parker suggests that outsiders are enormously important to Paul they determine whether Christian communities dwindle or thrive while also playing a key role in helping such communities to understand and shape their purpose as missional disciples develop their thinking and practice around normal daily events and relationships and even shape how they understand God Parker offers a careful exegesis of the main texts within the Pauline corpus revealing a sensitivity to the outsider including 1 Thessalonians Romans 1 Corinthians and the Pastoral Epistles By using Social Identity Theory she explores key concepts of group boundaries identity and inter-group relations highlighting a theme which is significant in Paul's own thought the importance of similarity between groups Whilst not denying the counter-cultural identity of the new Christian communities Parker concludes that Paul reveals the areas of overlap between insiders and outsiders since these areas not only create opportunities for positive opinions and relationships but also point to a greater understanding of God

Methodological Approaches in Kurdish Studies Bahar Baser, Yasin Duman, Mari Toivanen, Begum Zorlu, 2018-11-06 This edited volume presents thirteen contributions that reflect upon the practical ethical theoretical and methodological challenges that researchers face when conducting fieldwork in settings that are characterized with deteriorating security situations increasing state control and conflicting inter-ethnic relations More precisely they shed light to the intricacies of conducting fieldwork on highly politicized and sensitive topics in the region of Kurdistan in Iraq Syria and Turkey as well as among Kurdish diaspora members in Europe This volume is multidisciplinary in its focus and approach It includes contributions from scholars from various disciplinary backgrounds ranging from sociology and political science to social psychology and anthropology The complexity of security situations and the atmospheres of distrust and suspicion have led the contributors to be creative and to adapt their research methods in ways that at times transcend disciplinary boundaries and conventions Relatedly the contributions also open the often considered Pandora's box of discussing the failures in what is

often a messy research field and how to adopt one's methods to rapidly changing political circumstances. This necessitates greater reflexivity in existing power relations of the surrounding context and how those affect not only the interaction situations between the researcher and the participants but also raise questions for the overall research process concerning namely social justice representation and knowledge production. The contributions unravel this by unpacking positionalities beyond ethnicities discussing how gendered and other positionalities are constructed in fieldwork interactions and by illustrating how the surrounding structures of power and dominance are present in every day fieldwork. What differentiates this book from the existing literature is that it is the first academic endeavor that solely focuses on methodological reflections aimed to the field of Kurdish Studies. It offers a comprehensive and multidisciplinary account of scholars' fieldwork experiences in the Kurdish regions and as such it is also of value to scholars conducting or about to conduct fieldwork in conflict regions elsewhere.

History of the Native Woodlands of Scotland 1500-1920 T. C. Smout, 2007-09-15 The first modern history of Scottish woodlands this highly illustrated volume explores the changing relationship between trees and people from the time of Scotland's first settlement focusing on the period 1500 to 1920. Drawing on work in natural science, geography and history as well as on the author's own research it presents an accessible and readable account that balances social, economic and environmental factors. Two opening chapters describe the early history of the woodlands. The book is then divided into chapters that consider traditional uses and management, the impact of outsiders on the pine woods and the oakwoods in the first phase of exploitation and the effect of industrialization. Separate chapters are devoted to case studies of management at Strathcarron, Glenorchy, Rothiemurchus and on Skye.

Behavioural Economics and the Environment Alessandro Bucciol, Alessandro Tavoni, Marcella Veronesi, 2023-02-15 Humans have long neglected to fully consider the impact of their behaviour on the environment. From excessive consumption of fossil fuels and natural resources to pollution, waste disposal and in more recent years climate change, most people and institutions lack a clear understanding of the environmental consequences of their actions. The new field of behavioural environmental economics seeks to address this by applying the framework of behavioural economics to environmental issues, thereby rationalizing unexplained puzzles and providing a more realistic account of individual behaviour. This book provides a complete and rigorous overview of environmental topics that may be addressed and in many instances better understood by integrating a behavioural approach. This volume features state-of-the-art research on this topic by influential scholars in behavioural and environmental economics focussing on the effects of psychological, social and cognitive factors on the decision-making process. It presents research performed using different methods and data collection mechanisms, e.g. laboratory experiments, field experiments, natural experiments, online surveys on a variety of environmental topics, e.g. sustainability, natural resources. This book is a comprehensive and innovative tool for researchers and students interested in the behavioural economics of the environment and in the design of policy interventions aimed at reducing the human impact on the environment.
