Growing Pains Walter Wehrmeyer,Yacob Mulugetta,2017-10-19 Environmental management is a global phenomenon embracing all businesses in all countries whether or not there already exists an organised response to managing environmental impacts Today there are gross inequalities between the world s richest and poorest nations in terms of income distribution consumption patterns access to resources and environmental impact Yet both the developed north and the developing south are committed at least in words to achieving sustainable development Public awareness of environmental issues in the North has been rising in recent years and further degradation is now largely minimized through more stringent regulatory regimes voluntary agreements and growing consumer and stakeholder pressure on corporations Still the north is continuing to lead an environmentally unsustainable lifestyle as environmental improvements are nullified by overall increases in consumption levels In the south a billion people still do not have access to the most basic needs Poor countries need to accelerate their consumption growth if they are to ensure that the lives of their people are enriched However with rapid economic growth and corresponding increases in consumption now under way their environmental impact is soon to become substantially greater In a world that strives towards stemming global crises such as

climate change the path already taken by the rich and high growth economies over the past century cannot be repeated by the south if the desired objective is to create a future that is truly sustainable Growing Pains examines environmental management in the south from a number of perspectives It is designed to stimulate the discussion about the role that corporations and national and international organizations play in sustainable development It does not offer panaceas as each country has its own problems and opportunities and after almost 50 years of failed panacea oriented economic development policy transfer from the north to the south it is time to abandon hope for universal solutions and instead look to individual approaches that work The book is divided into five themes globalization the role of business a focus on national strategies trade and the environment and the organizational and structural challenges of sustainable development With contributions from an outstanding collection of authors in both the developed and developing worlds including UNIDO the Thailand Environment Institute Arthur D Little Inc Shell Peru IUCN the Russian Academy of Sciences and IIED this important and unique new book presents a body of work that will provide essential reading for businesses working in developing countries environmental and developmental NGOs and researchers engaged in the debate and sharing of best practice in this increasingly critical subject area

Building Communication Theory Dominic A. Infante, Andrew S. Rancer, Deanna F. Womack, 2003 The authors have organized this book to help students learn the process of theory building In clear engaging and comprehensible language they offer a solid foundation for understanding four perspectives on communication Rather than presenting theories in isolation they discuss major theories within the structure of a particular approach and provide examples of the contributions each theory has made to explaining and predicting behavior If a student develops criteria by which to judge a theory that critical framework can be applied to assess the strengths and weaknesses of any new theory Confidence in evaluating contributions helps students appreciate and participate in the process The connections between theorizing and practical applications stimulate interest and further exploration The text does not attempt to be encyclopedic rather it offers a synthesized coherent view of theory from the social scientific perspective emphasizing contributions from communication theorists Learning about theory should be an enjoyable experience Building Communication Theory creates a context for involving students in an exciting and valuable pursuit
