Handbook of Research on Digital Content Management and Development in Modern Libraries Thanuskodi, S., 2019-11-01 Collection assessment can be defined

as the systematic quantitative and qualitative measurement of the degree to which a library's collections meet the library's goals, objectives and the needs of its users. E-resources are creating new challenges for collection assessment which require that the collection be measured, analyzed and judged according to specific criteria for relevancy, size, quality and use. The Handbook of Research on Digital Content Management and Development in Modern Libraries is a critical scholarly resource that examines collection management and quality within information services. Featuring a wide range of topics such as e-resources, knowledge management and consortia, this book is ideal for professionals, academicians, academic librarians, researchers and students in the fields of library and information science, education, computer science and information technology. Moreover, the book will provide insights and support executives concerned with the management of expertise, knowledge, information and organizational development in different types of work communities and environments.

Handbook of Research on Representing Health and Medicine in Modern Media Sarı, Gülşah, 2021-04-02. Traditional and social media are used extensively in terms of public health today. Studies show that social media works much better than other follow-up systems, leading it to become a modern and somewhat new tool for disease coverage and information discovery. The current state of the representation of health and medicine in the media is an important factor to analyze in the field of health communication, especially amidst the onset of a global pandemic. The ways in which the media discusses health, the campaigns that are used and the ethics around this role of media and journalism are defining factors in the spread of information regarding health. The Handbook of Research on Representing Health and Medicine in Modern Media is a crucial reference that discusses health communication within two contexts: in terms of the media and journalists presenting critical health information and in terms of media literacy and information retrieval methods of media consumers through modern digital channels. The main purpose of these chapters is the development of critical thinking about health presentations and health communication issues in the media by presenting a discussion of the issues that will contribute to this vital view of health, medicine and diseases in the media. The primary topics highlighted in this book are infectious diseases in the media, campaigning, media ethics, digital platforms such as television and social media in health communication and the media's impact on individuals and society. This book is ideal for journalists, reporters, researchers, practitioners, public health officials, social media analysts, researchers, academicians and students looking for information on how health and medicine are presented in the media, the channels used for information delivery and the impact of the media on health and medicine.
