Accompanying DVD ROM in pocket at the rear of book     **A Look at Zambia's Road Financing Strategies: The Impact of Incongruent Policies and Budgets** Yohane Tembo,2015 There are various reasons why the road asset in Zambia has been deteriorating over the past five decades since independence Much effort to restore the road asset to its original value and keep it maintained in a good and safe condition was initiated in mid 1990s with the launch of the Road Sector Investment Plan Phase I which was immediately followed by the launch of a Phase II to run from 2003 to 2013 It is my appreciation that many diagnostic studies into road financing strategies which could have led to inefficient road asset management in Zambia have been undertaken and various solutions tendered The author takes cognizance that resource mobilization for road construction and maintenance and subsequent allocation to respective road programs can often be problematic for an emerging country like Zambia It has the potential to lead to inefficiencies in road asset management as has evidently been demonstrated in the declining road asset value over time The political as well as the economic landscape plays a vital role in resource mobilization and allocation strategies as much as the institutional and the legal framework do The failure to clear the backlog of maintenance which normally results largely from deferment of scheduled maintenance due to insufficient annual budgetary allocation to the road sector maintenance programs has led to the significant deterioration in road network condition Exorbitant road construction costs have posed additional challenges to the fiscus thereby constraining both the quantity and quality of road infrastructure that could be constructed and maintained

at any given time Recent policy drives have been categorical in their preference of new road construction aimed at linking Zambia over road maintenance which plays a pivotal role in road asset management This creates a perception that policy pronouncements are at variance to policy documents which promote sustainable economic development through efficient road investments and could be seen as being paradoxical in that the actual financing strategies are skewed towards road construction a recipe of comfort for the next election challenge due to increased visibility on the ground rather than to maintenance as an astute and effective way of managing the road asset The difficult of establishing congruence between government pronouncements and actual road business strategies in the implementing agencies has over the years posed challenges to the fiscal policy implementation Consequently this has often led to serious budget overruns due firstly to unplanned expenditure and secondly variations due to scope increase resulting from project implementation without having prior designs This has led to high operating inefficiencies of existing roads due to the high level of pavement degradation with the eventual effect of higher vehicle operating costs longer travel times driver and passenger discomfort and ultimately higher agency pavement replacement costs The damage caused to the economy is apparent in all this The author carried out an analysis of road financing strategies in Zambia taking a special look into the past decade with the view to ascertaining the extent to which roads budgets have been employed to fund new construction and maintenance This was necessary to establish whether there was a mismatch in allocation of resources for roads in terms of needs and policy in which new road construction is highly favored in preference to maintenance It was hoped that if the mismatch existed it would espouse some paradoxes which existed between the road asset management policies and actual strategies Casarett & Doull's
