

# SLIME

**What is Slime?**  
Slime is a soft, stretchy substance that can be made from various materials. It is often used as a toy or for decorative purposes. The word 'slime' comes from the Old English word 'slima', which means 'to crawl'.

**How to Make Slime**  
There are many different recipes for making slime. One common recipe involves mixing glue, water, and a borax solution. Another recipe uses shaving cream and contact lens solution. The process usually involves mixing the ingredients together and then kneading the mixture until it becomes a cohesive, stretchy mass.

**Slime Varieties**  
There are many different types of slime, each with its own unique texture and appearance. Some are soft and squishy, while others are more stretchy or crunchy. Some are made with natural ingredients, while others contain synthetic materials. The possibilities are endless!

**Slime Safety**  
While slime is generally safe to play with, it is important to take certain precautions. Always wash your hands thoroughly after playing with slime. Avoid getting slime in your eyes, nose, or mouth. If you have any allergies or sensitivities, be sure to read the ingredients list carefully before making or playing with slime.
