
CHAPTER 2- ACCOUNTING CONCEPTS AND PRINCIPLES

LEARNING OBJECTIVES:

At the end of this chapter, the student should be able to:

1. Define Accounting Concepts and Principles
 2. Explain the different Basic Accounting Concepts
 3. Enumerate and explain the various Qualitative Characteristics of Financial Statements
-

DEFINITION OF ACCOUNTING CONCEPTS AND PRINCIPLES

Set of logical ideas and procedures that guide the accountant in recording and communicating economic information. They provide a general framework by which accounting practice can be evaluated and they serve as guide in development of new practices and procedures.

BASIC ACCOUNTING CONCEPTS

1. **Separate Entity Concept-** the business is viewed as as a separate person, distinct from its owners. Only the transactions of the business are recorded in the books of accounts. The personal transactions of the business owner(s) are not recorded

the application of the separate entity concept is necessary so that the financial position and financial performance of a business can be measured properly. by applying the separate entity concept, you can objectively know if the business is really earning profits, or if it has the ability to do so.

2. **Historical Concept Principle-** Under this concept, assets are initially recorded at their acquisition cost.
3. **Going Concern-** it means that the accounting entity is viewed as continuing in operation indefinitely in the absence of evidence to the contrary.

It is also known as **continuity assumption**

in other words, financial statements are prepared normally on the assumption that the entity shall continue in operation for the foreseeable future.

The opposite of going concern is **Liquidating Concern**. If the business intends to end its operations or if it has no other choice but to do so
