Glencoe Algebra 1, 2001      Testing and Inclusive Schooling Bjorn Hamre, Anne Morin, Christian Ydesen, 2018-05-11  
Testing and Inclusive Schooling provides a comparative perspective on seemingly incompatible global agendas and efforts to include all children in the general school system thus reducing exclusion. With an examination of the international testing culture and the politics of inclusion currently permeating national school reforms, this book raises a critical and constructive discussion of these movements which appear to support one another yet simultaneously offer profound contradictions. With contributions from around the world, the book analyses the dilemma arising between reforms that urge schools to move towards a constantly higher academic level and those who practice a politics of inclusion leading to a greater degree of student diversity. The book considers the types of problems that arise when reforms implemented at the international level are transformed into policies and practices, firmly placing global educational efforts into perspective by highlighting a range of different cases at both national and local levels. Testing and Inclusive Schooling sheds light on new possibilities for educational improvements in global and local contexts and is essential reading for academics, researchers, and postgraduate students interested in international and comparative education, assessment technologies, and practices, inclusion, educational psychology, and educational policy.

**Indigenous Knowledge Systems integration into STEM education: A Zimbabwean perspective** Sunzuma G, Zezekwa N, Mudzamiri E, Chikuvadze P, 2025-05-25. The inclusion of Indigenous Knowledge Systems (IKS) in STEM education is a crucial step towards decolonizing knowledge and creating inclusive, relevant learning spaces that reflect culture. This book examines the theoretical, practical, and contextual aspects of incorporating IKS into Zimbabwe's STEM curriculum, with a focus on high school education. The book is a reflection of the realization that education systems in postcolonial societies like Zimbabwe must do more than simply propagate traditional Western paradigms. The lived experiences, past events, and educational institutions of their society must be reflected on and informed by them. The rich Indigenous knowledge in Zimbabwe has played a significant role in shaping communities' understanding of agriculture, health, engineering, mathematics, and the environment over time. Still, much of this knowledge has been marginalized in formal education. By providing a framework for the meaningful integration of IKS into STEM disciplines, this work seeks to close that gap. Indigenous Knowledge Systems are introduced in Chapter 1, detailing their origin, development, and philosophical basis. Chapter 2, "An Examination of the current integration of IKS into STEM education in Zimbabwe taking into account curricular approaches and classroom practice," Chapter 3 highlights the importance of evaluating and assessing integration efforts by proposing

culturally sensitive and multidimensional approaches that are appropriate for Zimbabwean classrooms In Chapter 4 we explore the challenges and obstacles to achieving successful IKS STEM integration such as teacher readiness epistemological tensions and systemic resistance Chapter 5 offers an exceptional examination of how Indigenous knowledge artefacts and practices can be utilized for conceptual development in high school STEM instruction with practical examples from Zimbabwean communities being included in the analysis It is aimed at teachers researchers and practitioners of decolonial education practices as well as policymakers and teacher trainers to develop locally relevant and globally relevant pedagogies We aspire that this work will contribute to advancing scholarship that recognizes Indigenous knowledge as essential living science and promotes African learners as both recipients and producers of valuable knowledge
