Environment Science Behind The Stories 3rd Edition:

Environment Jay H. Withgott, Scott Brennan, 2008-12-01

Environment Jay Withgott, Scott R. Brennan, 2008

Environment The Science behind the Stories captures student interest with a revolutionary new approach. Integrated central case studies are elaborated through each chapter using real life details of each story to give students a tangible and engaging framework around which to learn and understand conceptual scientific issues. The newly revised Third Edition enhances this book's focus on current data, scientific rigor and critical thinking with the addition of new hands on activities.

Essential Environment Scott R. Brennan, Jay Withgott, 2005 *Environment The Science Behind the Stories Brief*

Version is an introductory textbook that uses case studies and real data to demonstrate the role of science in solving pressing environmental problems. Dynamic central case studies are integrated throughout each chapter capturing readers attention and providing them with a contextual framework on which to build their understanding of concepts in environmental science. Science Behind the Story boxes explain how scientists know what they know about environmental problems while opposing viewpoints on contentious environmental issues allow readers to hear both sides of the story. With only 14 chapters the book avoids the encyclopedic approach of other textbooks on the market and instead offers only the essential concepts, theories and principles of environmental science. In particular the authors have condensed the material on environmental policy, agriculture, atmosphere and water providing the reader with the essential material they need in a more concise, affordable format. An Introduction to Environmental Science, Environmental Economics and Policy, Chemistry, Energy and Environmental Systems, Ecology and Evolution, Human Population Growth, Soils and Agriculture, Toxicology and Environmental Health, Atmospheric Science, Air Pollution and Climate Change, Marine and Freshwater Resources, Biodiversity and Conservation, Biology, Land Use, Forest Management and Creating Livable Cities, Nonrenewable Energy Sources and Their Environmental Impacts, Renewable Energy Sources, Waste Management. For all readers interested in using case studies and real data to demonstrate the role of science in solving pressing environmental problems.
