**Multimedia Computing Systems and Virtual Reality** Rajeev Tiwari, Neelam Duhan, Mamta Mittal, Abhineet Anand, Muhammad Attique Khan, 2022-04-05 Most events and activities in today's world are ordinarily captured using photos, videos, and other multimedia content. Such content has some limitation of storing data and fetching them effectively. Three-dimensional continuous PC animation is the most proper media to simulate these occasions and activities. This book focuses on futuristic trends and innovations in multimedia systems using big data, IoT, and cloud technologies. The authors present recent advancements in multimedia systems as they relate to various application areas such as healthcare services and agriculture-related industries. The authors also discuss human-machine interface design, graphics modelling, rendering, animation, image graphics techniques, systems, and visualization. They then go on to explore multimedia content adaptation for interoperable delivery. Finally, the book covers cultural heritage, philosophical, ethical, societal, international issues, standards, related virtual technology, and multimedia uses. This book is intended for computer engineers and computer scientists developing applications for multimedia and virtual reality and professionals working in object design and visualization, transformation, modelling, and animation of the real world. Features: Focuses on futuristic trends and innovations in multimedia systems using big data, IoT, and cloud technologies. Offers opportunity for state-of-the-art approaches, methodologies, and systems and innovative use of multimedia-based emerging technology services in different application areas. Discusses human-machine interface design, graphics modelling, rendering, animation, image graphics techniques, systems, and visualization. Covers cultural heritage, philosophical, ethical, societal, international issues, standards, related virtual technology, and multimedia uses. Explores multimedia content adaptation for interoperable delivery and recent advancements in multimedia systems in context to various application areas such as healthcare services and agriculture-related fields.
