Rodrigues,Belinda Smaill,2009-05-05 Youth Media and Culture in the Asia Pacific Region presents an analysis of youth media activities in a diverse but geographically connected Asia Pacific region The region which is spatially connected by its colonial and imperial past is becoming a significant player in the globalized world In this context youth situated in these economically politically and socially structured communities are redefining their locales through their patterns of media use The discourse of youth in this disparate region is manifest in the media through their identity articulations and social activism The book illustrates that these youth subcultures in the Asia Pacific are part of the well marketed global consumerism culture and yet at other times independent of the commodifying impetus of global capital It draws on case studies to examine some of the media practices youth in the region are engaged in and elucidates the process of social change taking place in some Asia Pacific nations This book contributes to the important and growing field of youth media studies The regionalization of media research is necessarily recuperated here bringing large populations of media users into a frame of reference that allows critical reflection on the new waves of use and sociality in the Asia Pacific region Stephanie Hemelryk Donald Professor of International Studies UTS      **The Routledge Research Companion to Electronic Music: Reaching out with Technology** Simon Emmerson,2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in

effect showing that there is emerging a different kind of global music
