Since Feeling is First Jayne Rowe,2005 Healing the Hyperactive Brain Michael Robert Lyon,2000 **Everything You Need**

to Know to Feel Good Candace B. Pert, 2010-06 Everything You Need to Know to Feel Good is Candace Pert's response to the questions she's been asked in her worldwide travels ever since the publication of her book *Molecules of Emotion* and her appearance in the film *What the Bleep Do We Know?* She discovered that at the end of the day all people really want to know is how to feel good. Within these pages Dr. Pert shares the answers she's found both in the biomedical laboratory of mainstream science and in the laboratory of her own evolving life. Her amazing journey documents how mind, body, and spirit cannot be separated and that we're hard-wired for bliss, which is both physical and divine. Feeling good and feeling God, she believes, are one and the same. From beginning to end, this book takes us on an entertaining romp through the many body-mind avenues separating the woo-woo from real science and pointing the way toward using new paradigm therapies: detoxing our food and environment, forgiving and healing our relationships, understanding depression, staying young, and creating the reality we want to experience. Consciousness, mind, emotions, and God are all factored into the mix, resulting in a lot of beneficial advice and self-development insights that will empower us toward health, well-being, and feeling Good.

Integrative Holistic Health, Healing, and Transformation Penny Lewis, 2002 The goal of this book is to begin to present the fundamental body of knowledge which informs current approaches in complementary and alternative medicine and to explore the role of the new professions of integrative holistic health practitioner, consultant, and administrator. This book is designed to compliment, enhance, deepen, and broaden the reader's existing expertise through an integrative approach which will improve his/her ability to consult, design programs, and work in a variety of settings with various populations, including those with medical and psychological conditions, as well as those who wish to support their health and well-being. The book provides the necessary conceptual, foundational frameworks for exploring how practitioners in a field of alternative medicine, holistic health, know what they know in support of their work. These core ways of knowing give them a foundation for evaluating their work, new advances in the field, and affords them interrelated frames of knowledge for their continued research, expansion, and integrative work in the field. Trained holistic health practitioners who may have applied one or more of these paradigms may now be able to expand their foundational and conceptual base, thereby broadening their theory and techniques that are appropriate to their professional arenas. Section I is designed to explore general ways of knowing and meaning-making in holistic health. Section II is designed to offer the reader practitioner methodology regarding the creation and implementation of holistic health centers, programs, and integrated consultation practices. Finally, Section III offers examples of integrative holistic health clinicians who combine and synthesize a variety of holistic health approaches and paradigms into their practices as practitioners, healers, therapists, and consultants.
