Provides a professional forum for presentation scrutiny and criticism of scientific research on topics outside the established
disciplines of mainstream science A critical forum of rationality and observational evidence for the often strange claims at the
fringes of science **The Truth Machines** Jinee Lokaneeta, 2020-02-26 Using case studies and the results of extensive
fieldwork this book considers the nature of state power and legal violence in liberal democracies by focusing on the
interaction between law science and policing in India The postcolonial Indian police have often been accused of using torture
in both routine and exceptional criminal cases but they and forensic psychologists have claimed that lie detectors brain scans
and narcoanalysis the use of truth serum Sodium Pentothal represent a paradigm shift away from physical torture most state
high courts in India have upheld this rationale The Truth Machines examines the emergence and use of these three scientific

techniques to analyze two primary themes First the book questions whether existing theoretical frameworks for understanding state power and legal violence are adequate to explain constant innovations of the state Second it explores the workings of law science and policing in the everyday context to generate a theory of state power and legal violence challenging the monolithic frameworks about this relationship based on a study of both state and non state actors Jinee Lokaneeta argues that the attempt to replace physical torture with truth machines in India fails because it relies on a confessional paradigm that is contiguous with torture Her work also provides insights into a police institution that is founded and refounded in its everyday interactions between state and non state actors Theorizing a concept of Contingent State this book demonstrates the disaggregated and decentered nature of state power and legal violence creating possible sites of critique and intervention

Aging Social Policies Robbyn R. Wacker, Karen A Roberto, 2010-12-07 Our population is aging What will we do about it Due to population explosion and a global increase in average life expectancies an unprecedentedly high percentage of the world's population is aging By the middle of this century there will be up to 2 billion individuals over the age of 65 a demographic shift never before experienced in our human history In addition declining birth rates in industrialized countries means a decrease in the number of adults under 64 In *Aging Social Policies An International Perspective* the authors consider how policy domestic and international affects and will continue to affect the lives of our aging population
