

CASE STUDIES

Question 1.

A shoe manufacturing company wants to become a market leader. For this a detailed planning is required. The first step taken by the firm is to set targets for the three months duration for selling maximum number of shoes in the market which they set as 2,50,000. The team doesn't want to make any mistake so they decide to do proper planning. They decide to chalk out alternative plans so that they can arrive at the best possible plan. However the team is surrounded with doubts. To remove doubts it goes for judging the plans to get the most profitable one. The plan is taken to the whole organisation and the concerned persons. Ultimately it is put into action. Without much caring for the results the company starts working on the other project simultaneously. Identify the steps in the planning process which have been applied by the organisation in the above case?

Answer:

In the above case the steps of planning which are applied are:

1. **Setting Objectives.** The first step taken by the firm is to set targets for the three months duration for selling maximum number of shoes in the market which they set as 2,50,000.
2. **Identifying alternative courses of action.** They decide to chalk out alternative plans so that they can arrive at the best possible plan.
3. **Evaluating the different courses of action.** To remove doubts it goes for selecting the plan which can be considered as the most profitable.
4. **Selection of the best plan.** The best plan is finalised.
5. **Implementation of the plan.** Ultimately it is put into action.

Question 2.

'Indian Drugs and Pharmaceuticals Ltd.' is engaged in the manufacturing and distribution of medicines. The company has set-up an objective of increasing its sales turnover by 20%. To achieve this objective the company has decided to diversify into baby health care products. Since the company has already set its objectives and developed the premises based on the same, it wants your help for the remaining steps to be taken in this process. Explain briefly these steps. [2016 Comptt. D]

Answer:

Following are the remaining steps in the planning process.

1. **Identifying alternatives.** In this step various alternative courses of action are identified. The identified course of action can either be routine or innovative in nature. An innovative course of action involves sharing of ideas by more and more people. In important projects more and more alternatives should be generated and discussed.
2. **Evaluating alternative courses.** In this step the positive as well as negative aspects associated with each and every alternative course of action is evaluated and analysed. In other words, the pros and cons of each alternative is studied.
3. **Selecting an alternative.** In this step the best plan is adopted and implemented. That plan is selected which has minimum negative aspects. The ideal plan should be the one which is most feasible and profitable.
4. **Implementing the plan.** In this step plans are put into action. All other managerial functions come into picture in this step. It involves doing what is required for the purpose of implementation of plan.
5. **Follow-up action.** This step involves monitoring of the plans. This step ensures that plans are being implemented and activities are performed as per schedule.

Question 3.

In the above case identify the steps of the planning process which are not indicated?

Answer:

The steps of the planning process which are not indicated in the above case are:

- Developing premises

Earl Sasser,1982 **Cases in Operations Management** Robert Johnston,Stuart Chambers,Christine Harland,1997-02 Cases in Operations Management Robert D. Klassen,2006 The Ivey Casebook Series is a co publishing partnership between SAGE Publications and the Richard Ivey School of Business at The University of Western Ontario Due to their popularity in more than 60 countries approximately 200 new cases are added to the Ivey School of Business library each year Each of the casebooks comes equipped with instructor s resources on CD ROM These affordable collections will not only help students connect to real world situations but will benefit corporations seeking continued education in the field as well Cases in Operations Management Building Customer Value Through World Class Operations is unique in its strong grounding in real world decisions The cases are structured into six chapters each of which offers an overview of key concepts Given that most managers will need to function effectively in an international context the cases draw from challenges faced by experienced managers in such varied settings as China France India Italy Japan the Netherlands Trinidad Vietnam and others in addition to the United States and Canada These cases continue to illustrate basic concepts while expanding students understanding of economic political and cultural concerns that must be interwoven into such key areas as process design quality and supply chain management The following are represented in this casebook Strong decision orientation of real world cases Clear development of the link between business processes and customer value Diversity of international case settings Mixture of cases simulations and in class exercises Includes Instructors Resources on CD ROM with detailed 6 10 page casenotes for each case preparation questions for students to review before class discussion questions and suggested further readings The IVEY Casebook Series Cases in Business Ethics Cases in Entrepreneurship Cases in Gender Diversity in Organizations Cases in Operations Management Cases in Organizational Behavior Cases in the Environment of Business Cases in Alliance Management Mergers and Acquisitions Text and Cases Cases in Operations Management K. N. KRISHNASWAMY,M. MATHIRAJAN,2008-08-18 This book is intended to enhance the knowledge of MBA students in Operations Management acquired in a basic level course The case study material covered relates to a wide spectrum of management activities and deals with the application of statistical operations research and system analysis

methods to problems categorized under several headings The book can therefore be used in conjunction with a course in Operations Management or as an independent second course Thirty one real world cases in the book are the result of several years of research work by the authors including consultancy assignments doctoral dissertations and project assignments of graduate management students The cases are research oriented and encourage students to think rigorously in an environment of uncertainty of a real world situation The cases are comprehensive enough to drill students in devising alternative methods of solutions and arm them with a deep understanding of decision making processes instead of merely providing them with a general appreciation of managerial perspective These realistic cases help in learning applications of quantitative and analytical techniques of management bringing home to the student the challenges of managing activities throughout the organization Though a new title it is an enlarged version of Dr Krishnaswamy s earlier book Cases in Production Operations Management
