**Deep Learning for Radar and Communications Automatic Target Recognition** Uttam K. Majumder, Erik P. Blasch, David A. Garren, 2020-07-31 This authoritative resource presents a comprehensive illustration of modern Artificial Intelligence Machine Learning AI ML technology for radio frequency RF data exploitation It identifies technical challenges benefits and directions of deep learning DL based object classification using radar data including synthetic aperture radar SAR and high range resolution HRR radar The performance of AI ML algorithms is provided from an overview of machine learning ML theory that includes history background primer and examples Radar data issues of collection application and examples for SAR HRR data and communication signals analysis are

discussed In addition this book presents practical considerations of deploying such techniques including performance evaluation energy efficient computing and the future unresolved issues

**Use of Machine Learning in Radio Frequency Integrated Circuits (RFIC) Development** Qiang Cui (Computer engineer),2015 This Master s Thesis starts with an introduction to the radio frequency integrated circuits RFICs industry and a discussion on the key problem of the existing RFIC development process the need for multiple trial and error iterations due to inaccurate simulations This simulation inaccuracy happens because the existing electronic design automation EDA software and the underlying physics based IC models fail to fully capture the nonlinear frequency dependent RF parasitic effects To overcome this problem in this thesis we propose the use of machine learning in RFIC development Machine learning uses statistical models to recognize hidden patterns from sample data points known as training generalize patterns and make predictions based on new data In theory machine learning can capture the nonlinear frequency dependent RF parasitic effects very well thanks to the large variety of nonlinear modelling techniques at its disposal such as polynomial regressions and neural networks Therefore this thesis investigates for the first time the feasibility of using machine learning in RFIC development to solve the problem of inaccurate RFIC simulation
